DOCKET NO. RG-00000A-04-0169

DECISION NO. 67442

OPINION AND ORDER

DATE OF HEARING: July 19, 2004
PLACE OF HEARING: Phoenix, Arizona
ADMINISTRATIVE LAW JUDGE: Amanda Pope
IN ATTENDANCE: Mike Gleason, Commissioner
Kristin K. Mayes, Commissioner
APPEARANCES: Kevin Kent, on behalf of the Arizona Utility Group;
Craig Roecks, Assistant General Counsel, on behalf of
Southwest Gas Corporation;
Paul Lopez, on behalf of El Paso Pipeline Group;
Mike Comstock, on behalf of the City of Mesa; and
Jason D. Gellman, Legal Division, on behalf of the
Commission's Utilities Division Staff.

BY THE COMMISSION:

On May 24, 2004, the Arizona Corporation Commission ("Commission") issued Decision No. 66994, ordering publication of a Notice of Proposed Rulemaking in the Arizona Administrative Register and the scheduling of a public comment hearing regarding the proposed rulemaking to amend transportation rules Arizona Administrative Code ("A.A.C.") R14-5-202, R14-5-203, R14-5-204, and R14-5-205. The purpose of the proposed amendments is to update the Commission's Rules to incorporate the most recent amendments to the Code of Federal Regulations ("CFR"), Title 49, Parts 191, 192, 193, 195, 199 and Part 40, to set forth annual report filing requirements for operators of hazardous liquid pipelines, and to set forth laboratory and test selection procedures for both intrastate pipeline operators and master meter operators.

1 By Procedural Order issued May 27, 2004, a public comment hearing on the proposed rule
2 amendment was scheduled for July 19, 2004. The Procedural Order stated that comments on the
3 proposed rule amendment would be taken through the date of the public comment hearing, and
4 established a schedule for the filing of formal written comments and responses prior to the public
5 comment hearing.

6 A Notice of Proposed Rulemaking regarding the proposed amendments was filed with the
7 Secretary of State and was published in the Arizona Administrative Register on June 18, 2004.

8 On June 21, 2004, the Arizona Utility Group ("AUG") filed written comments on proposed
9 amendments to A.A.C. R14-5-202(O), (P), (R), and (S).

10 On July 6, 2004, Staff filed responsive comments to AUG's June 21, 2004 filing. By its
11 filing, Staff indicated that a meeting with representatives from AUG was set for July 7, 2004 and that
12 supplemental comments would be filed by Staff subsequent to that meeting, which would indicate
13 whether it believes modifications to the proposed rules are appropriate.

14 Staff further indicated that it had received verbal comments from the Office of the Secretary
15 of State.

16 On July 12, 2004, Staff filed its Supplemental Response to AUG's Comments Regarding the
17 Proposed Rulemaking.

18 On July 14, 2004, AUG filed comments in response to the July 7, 2004 meeting, which set
19 forth AUG's concerns with respect to those areas where agreement was not reached.

20 On July 15, 2004, El Paso Pipeline Group ("El Paso") filed comments on proposed
21 amendments to A.A.C. R14-5-202(O) and (S) based upon its review of the proposed rules and its
22 participation in the July 7, 2004 meeting.

23 A public comment hearing was held as scheduled on July 19, 2004, at which the Commission
24 heard oral comments from AUG, Southwest Gas Corporation ("SWG"), El Paso, the City of Mesa,
25 and Staff.

26 During the public comment hearing, AUG, SWG and the City of Mesa indicated that they
27 intended to submit revisions to the proposed language contained in A.A.C. R14-5-202(S).

28 A Procedural Order was issued on July 19, 2004, directing that written revisions to A.A.C.

1 R14-5-202(S) be filed by August 2, 2004, directing Staff to respond to any comments made at the
2 public hearing as well as to any suggested language for A.A.C. R14-5-202(S) by August 16, 2004,
3 and directing any interested parties to file responses thereto by August 30, 2004.

4 On August 2, 2004, UNS, AUG, and SWG separately filed proposed changes to the language
5 of A.A.C. R14-5-202(S). Additionally, SWG filed proposed changes as well as additional comments
6 relating to several other provisions of the proposed rules.

7 Staff filed responsive comments on August 17, 2004.

8 On August 30, 2004, SWG filed its Opposition to Unisource Gas, Inc.'s Comments and Reply
9 to Staff's Responsive Comments, which offered rebuttal to Staff's comments as filed on August 17,
10 2004 and stated that UNS' August 2, 2004 proposed amendment would engender further confusion.

11 On August 30, 2004, AUG, excluding UNS, filed a letter indicating support for the comments
12 submitted by SWG on August 30, 2004.

13 On September 15, 2004, SWG filed a letter on behalf of AUG, UNS, and Staff by which it
14 requested a deferral of a Decision in this matter until September 27, 2004 as the parties were
15 continuing to negotiate a resolution to the disagreement regarding the text of the proposed rule
16 relating to reporting obligations for pipeline operators.

17 On September 24, 2004, Staff contacted the Hearing Division to indicate that the parties were
18 continuing to work toward a resolution of the proposed language for R14-5-202(S) and R14-5-205(P)
19 and to request, on behalf of SWG and UNS, an extension of the September 27, 2004 deadline until
20 October 1, 2004.

21 By Procedural Order dated September 27, 2004, Staff, SWG, and UNS were granted an
22 extension for the filing of any consensus language until October 1, 2004.

23 On October 1, 2004, Staff filed its Notice of Consensus Regarding A.A.C. R14-5-202(S)(1)
24 and R14-5-205(P)(1).

25 On October 4, 2004, Staff filed its Notice of Filing Errata Attachment A Consensus, which
26 provided the text of the consensus language referenced in its October 1, 2004 filing.

27 On October 4, 2004, SWG filed a letter indicating that all parties to the negotiation, namely
28 SWG, Staff, AUG, and UNS, agree to the proposed language for R14-5-202(S)(1), which was

1 provided as an attachment and mirrored that provided by Staff in its October 4, 2004 filing. SWG
2 additionally indicated those sections of the rule for which its objections stand as well as those
3 sections for which arguments it previously presented should be considered waived.

4 Comments that the Commission received on specific sections of the Proposed Rules following
5 their publication, including both technical and legal issues, and the Commission' analysis and
6 resolution of those comments, are summarized in Appendix B, which is attached to and incorporated
7 in this Decision. In response to comments received, some clarifying language has been incorporated
8 in some sections of the Proposed Rules, as explained in Appendix B, but no substantial changes to the
9 Proposed Rules are required. The text of the Proposed Rules incorporating the modifications is
10 attached to and incorporated in this Decision as Appendix A. Also attached to and incorporated in
11 this Decision is Appendix C, which is an Economic, Small Business, and Consumer Impact
12 Statement.

13 * * * * * * * * *

14 Having considered the entire record herein and being fully advised in the premises, the
15 Commission finds, concludes, and orders that:

16 **FINDINGS OF FACT**

- 17 1. On March 4, 2004, Staff filed a Memorandum to open this rulemaking docket.
- 18 2. On March 10, 2004, Staff docketed a Proposed Order containing Staff's final draft of
19 the Proposed Rules. The Proposed Order recommended that the Commission direct the Hearing
20 Division to issue a Procedural Order setting a period for public comment on the proposed rules and
21 setting the date for a public comment hearing.
- 22 3. On March 18, 2004, Staff filed a Notice of Errata by which Staff corrected errors in
23 the proposed amendments to A.A.C. R14-5-202(P) and R14-5-205(J) and submitted a new rules
24 package incorporating those changes. By its filing, Staff requested that the rulemaking package
25 attached to its March 18, 2004 filing supplant the rulemaking package docketed on March 10, 2004.
- 26 4. On May 24, 2004, the Commission issued Decision No. 66994, which ordered
27 publication of a Notice of Proposed Rulemaking in the Arizona Administrative Register and the
28 scheduling of a public comment hearing regarding the making of the Proposed Rules, which were

1 attached to the Decision.

2 5. On May 27, 2004, a Procedural Order was issued by which the Commission scheduled
3 a public comment hearing on the Proposed Rules for July 19, 2004.

4 6. Pursuant to law, the Notice of Proposed Rulemaking was published on June 18, 2004
5 in the Arizona Administrative Register.

6 7. On June 21, 2004, AUG filed written comments on proposed amendments to A.A.C.
7 R14-5-202(O), (P), (R), and (S).

8 8. On July 6, 2004, Staff filed responsive comments to AUG's June 21, 2004 filing,
9 which indicated that a meeting with representatives from AUG was set for July 7, 2004 and that Staff
10 intended to file supplemental comments subsequent to that meeting.

11 9. By its July 6, 2004 filing, Staff additionally indicated that it had received verbal
12 comments from the Office of the Secretary of State.

13 10. On July 12, 2004, Staff filed its Supplemental Response to AUG's Comments
14 Regarding the Proposed Rulemaking

15 11. On July 14, 2004, AUG filed comments in response to the July 7, 2004 meeting,
16 which set forth AUG's concerns with respect to those areas where agreement was not reached.

17 12. On July 15, 2004, El Paso filed comments on proposed amendments to A.A.C. R14-5-
18 202(O) and (S).

19 13. On July 19, 2004, a public comment hearing was held as scheduled, at which the
20 Commission heard oral comments from AUG, SWG, El Paso, the City of Mesa, and Staff.

21 14. During the public comment hearing, AUG, SWG and the City of Mesa indicated that
22 they intended to submit revisions to the proposed language contained in A.A.C. R14-5-202(S).

23 15. A Procedural Order was issued on July 19, 2004, which directed that proposed
24 revisions to A.A.C R14-5-202(S) be filed by August 2, 2004, that Staff respond to any comments
25 made at the public hearing as well as to any suggested language for A.A.C. R14-5-202(S) by August
26 16, 2004, and that any responses thereto be filed by any interested party by August 30, 2004.

27 16. On August 2, 2004, UNS, AUG and SWG filed proposed changes to the language of
28 A.A.C. R14-5-202(S), and SWG additionally filed comments relating to several other provisions of

1 the proposed rules.

2 17. Staff filed responsive comments on August 17, 2004.

3 18. On August 30, 2004, SWG filed its Opposition to Unisource Gas, Inc.'s Comments
4 and Reply to Staff's Responsive Comments, which offered rebuttal to Staff's comments as filed on
5 August 17, 2004 and stated that UNS' August 2, 2004 proposed amendment would engender further
6 confusion.

7 19. On August 30, 2004, AUG, excluding UNS, filed a letter indicating support for the
8 comments submitted by SWG on August 30, 2004.

9 20. On September 15, 2004, SWG filed a letter on behalf of AUG, UNS, and Staff by
10 which it requested a deferral of a Decision in this matter until September 27, 2004 as the parties were
11 continuing to negotiate a resolution to the disagreement regarding the text of the proposed rule
12 relating to reporting obligations for pipeline operators.

13 21. On September 24, 2004, Staff contacted the administrative law judge to indicate that
14 the parties were continuing to work toward a resolution of the proposed language for R14-5-202(S)
15 and R14-5-205(P) and to request, on behalf of SWG and UNS, an extension of the September 27,
16 2004 deadline until October 1, 2004.

17 22. By Procedural Order dated September 27, 2004, Staff, SWG, and UNS were granted
18 an extension for the filing of any consensus language until October 1, 2004.

19 23. On October 1, 2004, Staff filed its Notice of Consensus Regarding A.A.C. R14-5-
20 202(S)(1) and R14-5-205(P)(1).

21 24. On October 4, 2004, Staff filed its Notice of Filing Errata Attachment A Consensus,
22 which provided the text of the consensus language referenced in its October 1, 2004 filing.

23 25. On October 4, 2004, SWG filed a letter indicating that all parties to the negotiation,
24 namely SWG, Staff, AUG, and UNS, agree to the proposed language for R14-5-202(S)(1), which was
25 provided as an attachment and mirrored that provided by Staff in its October 4, 2004 filing. SWG
26 additionally indicated those sections of the rule for which its objections stand as well as those
27 sections for which arguments it previously presented should be considered waived.

28 26. The proposed amendments to A.A.C. R14-5-202 through R14-5-205 update the

1 Commission's Rules to incorporate the most recent amendments to the CFR, Title 49, Parts 191, 192,
2 193, 195, 199 and Part 40, which includes the requirement that operators of hazardous liquid
3 pipelines submit an annual report.

4 27. In addition, the proposed amendments set parameters for laboratory testing for both
5 intrastate pipeline operators and master meter operators, require that all newly installed natural gas,
6 other gas or hazardous liquid intrastate pipelines have proper bedding and shading, require that all
7 plastic pipe and fittings be marked with CD, CE, CF or CG per ASTM D2513, and update the
8 location of the Office of Pipeline Safety.

9 28. A summary of the comments that the Commission received on specific sections of the
10 proposed rules following their publication is attached hereto as Appendix B and incorporated herein
11 by reference. Appendix B was prepared in accordance with A.R.S. § 41-1001(14)(d)(iii) and is to be
12 included in the Preamble to be published with the Notice of Final Rulemaking.

13 29. In response to comments received, as explained in Appendix B, some clarifying
14 language has been incorporated into certain sections of the Proposed Rules, but no substantial
15 changes to the Proposed Rules are required.

16 30. The text of the Proposed Rules incorporating the clarifying modifications is set forth
17 in Appendix A, attached hereto and incorporated herein by reference.

18 31. No Notice of Supplemental Rulemaking is required.

19 32. Prepared in accordance with A.R.S. § 41-1057, the Economic, Small Business, and
20 Consumer Impact Statement is set forth in Appendix C, attached hereto and incorporated herein by
21 reference.

22 CONCLUSIONS OF LAW

23 1. Pursuant to Article XV of the Arizona Constitution, §§ 40-202, 40-203, 40-321, 40-322,
24 and 40-441 *et seq.*, the Commission has jurisdiction to enact amended A.A.C. R14-5-202 through
25 A.A.C. R14-5-205.

26 2. Notice of the hearing was given in the manner prescribed by law.

27 3. The Proposed Rules as set forth in Appendix A contain no substantial changes from the
28 Proposed Rules published in the Notice of Proposed Rulemaking.

1 4. Enactment of A.A.C. R14-5-202 through A.A.C. R14-5-205 as set forth in Appendix A is
2 in the public interest.

3 5. The Summary of Comments and Response set forth in Appendix B should be adopted.

4 6. The Economic, Small Business, and Consumer Impact Statement set forth in Appendix C
5 should be adopted.

6 **ORDER**

7 IT IS THEREFORE ORDERED that proposed amended A.A.C. R14-5-202 through A.A.C.
8 R14-5-205 as set forth in Appendix A and the Summary of Comments and Response as set forth in
9 Appendix B are hereby adopted.

10 IT IS FURTHER ORDERED that the Economic, Small Business, and Consumer Impact
11 Statement, as set forth in Appendix C, is hereby adopted.

12 IT IS FURTHER ORDERED that the Commission's Utilities Division shall submit adopted
13 amended Rules A.A.C. R14-5-202 through A.A.C. R14-5-205, as set forth in Appendix A; the
14 Summary of Comments and Response, as set forth in Appendix B; and the Economic, Small
15 Business, and Consumer Impact Statement, as set forth in Appendix C; to the Office of the Attorney
16 General for endorsement as part of the rule package submission required by A.R.S. § 41-1044.

1 IT IS FURTHER ORDERED that the Commission's Utilities Division is authorized to make
 2 non-substantive changes in the adopted amended Rules A.A.C. R14-5-202 through A.A.C. R14-5-
 3 205, and to the adopted Summary of Comments and Response, in response to comments received
 4 from the Attorney General's office during the approval process under A.R.S. § 41-1044 unless, after
 5 notification of those changes, the Commission requires otherwise.

6 IT IS FURTHER ORDERED that this Decision shall become effective immediately.

7 BY ORDER OF THE ARIZONA CORPORATION COMMISSION.

Appendix A**ARTICLE 2. PIPELINE SAFETY****R14-5-202. Construction and Safety Standards**

A. Applicability: This rule applies to the construction, reconstruction, repair, operation and maintenance of all intrastate natural gas, other gas, LNG and hazardous liquid pipeline systems, as described in A.R.S. § 40-441.

B. Subject to the definitional changes in R14-5-201 and the revisions noted in subsection (C), the Commission adopts, incorporates, and approves as its own 49 CFR 40, 191, 192 except I (2) and (3) of Appendix D to Part 192, 193, 195, except 195.1(b)(2) and (3), and 199, revised as of ~~January 16, 2002~~ January 15, 2004 (and no future amendments), incorporated by reference, ~~on file with the Office of the Secretary of State, and copies available from the Commission Office of Pipeline Safety, 1200 West Washington, Phoenix, Arizona 85007~~ 2200 North Central Avenue, Suite 300, Phoenix, Arizona 85004 and the United States Government Printing Office, P.O. Box 371954, Pittsburgh, Pennsylvania 15250-7954 ~~P.O. Box 371975M, Pittsburgh, Pennsylvania 15250-7975~~.

C. The above mentioned incorporated Parts of 49 CFR, except Parts 191, 193 Subpart A and 195 Subpart A and B, are revised as follows:

1. Substitute "Commission" where "Administrator of the Research and Special Programs Administration" or "Office of Pipeline Safety" (OPS) appear.
2. Substitute "Office of Pipeline Safety, Arizona Corporation Commission, at its office in Phoenix, Arizona" where the address

1 for the Information Resources Manager, Office of Pipeline Safety,
2 Research and Special Programs Administration, U. S. Department
3 of Transportation appears.

4 D. Operators of an intrastate pipeline will file with the Commission an Operation and
5 Maintenance Plan (O & M), including an emergency plan, 30 days prior to
6 placing a pipeline system into operation. Any changes in existing plans will be
7 filed within 30 days of the effective date of the change.

8
9 E. Operators of an intrastate pipeline transporting sour gas or oil are subject to
10 industry standards addressing facilities handling hydrogen sulfide (H₂S).

11 Standards adopted are:

12 1. NACE Standard MR-0175-99 (1999 Revision); (and no future
13 revisions), Standard Materials Requirements-Sulfide Stress
14 Cracking Resistant Metallic Material for Oilfield Equipment,
15 incorporated by reference and no future amendments. Copies are
16 available from the ~~Commission~~ Office of Pipeline Safety, 1200
17 ~~West Washington, Phoenix, Arizona 85007~~ 2200 North Central
18 Avenue, Suite 300, Phoenix, Arizona 85004 and the NACE
19 International, 1440 South Creek Drive, Houston, Texas 77084-
20 4906 ~~P.O. Box 218340, Houston, Texas 77218-8340~~ and on file
21 ~~with the Office of the Secretary of State.~~

22
23
24 2. API RP55 (1995 Edition); (and no future amendments), API
25 recommended practice for conducting oil and gas production
26 operations involving hydrogen sulfide, incorporated by reference
27
28

1 and no future amendments. Copies are available from the
2 ~~Commission~~ Office of Pipeline Safety, 1200 West Washington,
3 ~~Phoenix, Arizona 85007~~ 2200 North Central Avenue, Suite 300,
4 Phoenix, Arizona 85004 and Techstreet, 777 East Eisenhower
5 Parkway, Ann Arbor, Michigan 48108 ~~the CSSINFO, 310 Miller~~
6 ~~Avenue, Ann Arbor, Michigan, 48103 and on file with the Office~~
7 ~~of the Secretary of State.~~
8

9 F. Operators of an intrastate pipeline transporting LNG, hazardous liquid, natural gas
10 or other gas will not construct any part of a hazardous liquid, LNG, natural gas or
11 other gas pipeline system under a building. For building encroachments over a
12 pipeline system, the operator may require the property owner to remove the
13 building from over the pipeline or reimburse the operator the cost associated with
14 relocating the pipeline system. The encroachment shall be resolved within 180
15 days of discovery, or the operator shall discontinue service to the pipeline system.
16 When the encroachment can not be resolved within the 180 days the operator
17 shall submit to the Office of Pipeline Safety within 90 days of discovery a written
18 plan to resolve the encroachment. The Office of Pipeline Safety may then extend
19 the 180-day requirement in order to allow the ratepayer and the operator to
20 implement the written plan to resolve the encroachment.
21

22
23 G. Operators of an intrastate distribution pipeline transporting LNG, ~~hazardous~~
24 ~~liquid~~, natural gas or other gas will not construct any part of a pipeline system
25 closer than 8 inches to any other underground structure. If the 8-inch clearance
26
27
28

1 cannot be maintained from other underground structures, a sleeve, casing, or
2 shielding shall be used.

3 H. Operators of an intrastate pipeline transporting natural gas or other gas that have
4 regulators, meters, or regulation meter sets that have been out of service for 36
5 months will abandon those lines and cap all ends. The Operator's steps to
6 accomplish the abandonment shall not exceed 6 months beyond the 36 months out
7 service status.

9 I. Operators of an intrastate pipeline shall not install or operate a gas regulator that
10 might release gas in its operation closer than 3 feet to a source of ignition,
11 opening into a building, air intake into a building or to any electrical source not
12 intrinsically safe. The three (3) foot clearance from a source of ignition will be
13 measured from the vent or source of release (discharge port), not from the
14 physical location of the meter set assembly. This subsection shall not be effective
15 with respect to building permits which are issued and subdivisions which are
16 platted prior to October 1, 2000. For encroachment within the required three foot
17 clearance caused by an action of the property owner, occupant or a service
18 provider, after the effective date of this rule the operator may require the property
19 owner to resolve the encroachment or reimburse the operator the cost associated
20 with relocating the pipeline system. The encroachment shall be resolved within
21 180 days of discovery or the operator shall discontinue service to the effected
22 pipeline system. When the encroachment cannot be resolved within the 180 days
23 the operator shall submit to the Office of Pipeline Safety within 90 days of
24 discovery a written plan to resolve the encroachment. The Office of Pipeline
25
26
27
28

1 Safety may then extend the 180-day requirement in order to allow the ratepayer
2 and the operator to implement the written plan to resolve the encroachment.

3 J. Operators of an intrastate pipeline transporting LNG, natural gas, other gases or
4 hazardous liquid will utilize a cathodic protection system designed to protect the
5 metallic pipeline in its entirety, in accordance with 49 CFR 192, Subpart I,
6 ~~January 16, 2002~~ January 15, 2004 (and no future amendments), incorporated by
7 reference, ~~on file with the Office of the Secretary of State~~, and copies available
8 from the ~~Commission~~ Office of Pipeline Safety, ~~1200 West Washington, Phoenix,~~
9 ~~Arizona 85007~~ 2200 North Central Avenue, Suite 300, Phoenix, Arizona 85004
10 and the United States Government Printing Office, P.O. Box 371954, Pittsburgh,
11 Pennsylvania 15250-7954 ~~P.O. Box 371975M, Pittsburgh, Pennsylvania 15250-~~
12 ~~7975~~ except I (2) and (3) of Appendix D to Part 192 shall not be utilized.

13
14
15 K. Operators of an intrastate pipeline transporting natural gas or other gas will not
16 use solvent cement to join together plastic pipe manufactured from different
17 materials unless the operator utilizes a joining procedure in accordance with the
18 specifications of 49 CFR 192, Subpart F, ~~January 16, 2002~~ January 15, 2004 (and
19 no future amendments), incorporated by reference, ~~on file with the Office of the~~
20 ~~Secretary of State~~, and copies available from the ~~Commission~~ Office of Pipeline
21 Safety, and the United States Government Printing Office, P.O. Box 371954,
22 Pittsburgh, Pennsylvania 15250-7954 ~~P.O. Box 371975M, Pittsburgh,~~
23 ~~Pennsylvania 15250-7975.~~

1 L. Operators of an intrastate pipeline transporting hazardous liquid, natural gas or
2 other gas will not install Acrylonitrile-Butadiene-Styrene (ABS) or aluminum
3 pipe in their pipeline systems.

4 M. Operators of an intrastate pipeline transporting hazardous liquid, natural gas or
5 other gas will not install plastic pipe aboveground unless the plastic pipeline is
6 protected by a metal casing, or equivalent, and approved by the Office of Pipeline
7 Safety. Temporary aboveground plastic pipeline bypasses are permitted for up to
8 sixty (60) days, provided that the plastic pipeline is protected and is under the
9 direct supervision of the operator at all times.

10 N. Operators of an intrastate pipeline transporting hazardous liquid, natural gas or
11 other gas that construct a pipeline system or any portion thereof using plastic pipe,
12 will install, at a minimum, a 14-gauge coated or corrosion resistant, electrically
13 conductive wire as a means of locating the pipe while it is underground. Tracer
14 wire shall not be wrapped around the plastic pipe, tracer wire may be taped, or
15 attached in some manner to the pipe provided that the adhesive or the attachment
16 is not detrimental to the integrity of the pipe wall.

17 O. Operators of an intrastate pipeline transporting ~~hazardous liquid~~, natural gas, or
18 other gas or hazardous liquid pipeline system that construct an underground
19 pipeline system ~~using plastic pipe~~ using plastic pipe, will bury the installed pipe
20 with a minimum of 6 inches of sandy type soil surrounding the pipe for bedding
21 and shading, free of any rock or debris, unless otherwise protected and approved
22 by the Office of Pipeline Safety. Steel pipe shall be installed with bedding and
23
24
25
26
27
28

1 shading, free of any debris or materials injurious to the pipe coating, unless
2 otherwise protected and approved by the Office of Pipeline Safety.

3 P. Operators of an intrastate pipeline transporting natural gas or other gas pipeline
4 system that construct an underground pipeline system using plastic pipe will
5 install the pipe with sufficient slack to allow for thermal expansion and
6 contraction. ~~In addition, all plastic pipe shall be marked CD or CE as required by~~
7 ~~ASTM D2513-95e~~ In addition, all plastic pipe and fittings shall be marked "Gas"
8 and shall be marked CD, CE, CF or CG as required by ASTM D2513 (1995c
9 Edition and no future editions), incorporated by reference, on file with the Office
10 of the Secretary of State, and copies available from the Commission Office of
11 Pipeline Safety, 1200 West Washington, Phoenix, Arizona 85007 2200 North
12 Central Avenue, Suite 300, Phoenix, Arizona 85004 and ASTM International, 100
13 Barr Harbor Drive, P.O. Box C700, West Conshohocken, Pennsylvania 19428-
14 2959, the ASTM, 1916 Race Street, Philadelphia, Pennsylvania 19103-1187, for
15 areas where the service temperature is above 100°F.

16 Q. Operators of an intrastate pipeline system transporting hazardous liquid, natural
17 gas or other gases shall qualify welding procedures and shall perform welding of
18 steel pipelines in accordance with API Standard 1104. Each welder must be
19 qualified in accordance with API Standard 1104, 49 CFR 192, appendix A. The
20 qualification of welders delineated in 49 CFR 192, appendix C may be used for
21 low stress level pipe.

22 R. Operators of an intrastate pipeline transporting natural gas or other gas pipeline
23 system shall survey and grade all detected leakage by the following guide: ASME
24
25
26
27
28

1 Guide for Gas Transmission and Distribution Pipeline System, Guide Material,
 2 Appendix G-11-1983 except 4.4(c) (1983 Revision and no future revisions),
 3 incorporated by reference ~~and on file with the Office of the Secretary of State and~~
 4 copies available from the ~~Commission~~ Office of Pipeline Safety, ~~1200 West~~
 5 ~~Washington, Phoenix, Arizona 85007~~ 2200 North Central Avenue, Suite 300,
 6 Phoenix, Arizona 85004 and the ASME, United Engineering Center, 345 East 47th
 7 Street, New York, N. Y. 10017. ("Should" as referenced in the Guide will be
 8 interpreted to mean "shall"). Leakage survey records shall identify in some
 9 manner each pipeline surveyed. Records shall be maintained to demonstrate that
 10 the required leakage survey has been conducted.

12 S. Laboratory testing of intrastate pipelines shall be conducted in accordance with
 13 the following:

- 14
- 15 1. If an operator of an intrastate natural gas, other gas or hazardous liquid
 16 pipeline removes a portion of a pipeline that failed for any reason other
 17 than observable external corrosion or third party damage, failed pipeline,
 18 where the cause of the failure is unknown, from as the result of an incident
 19 that requires a telephonic or written incident report under R14-5-203(B) or
 20 (C), the operator shall retain the portion that was removed and shall
 21 telephonically notify the Office of Pipeline Safety of the removal within
 22 two hours after the removal is completed. A notice made pursuant to this
 23 paragraph subsection shall include all of the following:

- 24
- 25 a. Identity of the failed pipeline.
- 26 b. Description and ~~Location~~ location of the failure.
- 27
- 28

- 1 c. Date and time of the removal.
- 2 d. Length or quantity of the removed portion.
- 3 e. Storage location of the removed portion.
- 4 f. The operator's opinion regarding the probably cause or causes of
5 the failure.
- 6 f. Any additional information about the failure or the removal of the
7 portion of the pipeline that failed that is requested by the Office of
8 Pipeline Safety.

9 An unknown failure is any failure where the cause of the failure is not
10 observable external corrosion, third-party damage, natural or other outside
11 forces, construction or material defect, equipment malfunction or incorrect
12 operations; or is any failure where the Office of Pipeline Safety and the
13 operator do not agree as to the cause of the failure.

- 14 2. Within forty-eight hours after telephonic notification pursuant to
15 paragraph subsection (1), the Office of Pipeline Safety shall notify the
16 operator either that either:

- 17 a. The Office of Pipeline Safety is directing the operator to have the
18 portion of the pipeline that was removed tested by a laboratory to
19 determine the cause or causes of the failure; or
- 20 b. The Office of Pipeline Safety is not directing laboratory testing and
21 the operator may discard the portion of the pipeline that was
22 removed.

23 The Office of Pipeline Safety shall confirm its notification in writing.

1 3. If the Office of Pipeline Safety directs laboratory testing pursuant to
2 paragraph 2, subparagraph a subsection (2)(a):

3 a. The Office of Pipeline Safety shall:

4 i. Determine the laboratory that will do the testing pursuant to
5 paragraph subsection (4) and the period of time within which the
6 testing is to be completed.

7 ii. Approve the number and types of tests to be performed.

8 iii. Notify the operator of its determinations pursuant to items i and ii
9 of this subparagraph subsections (3)(a)(i) and (ii).

10 b. The operator shall:

11 i. Notify the Office of Pipeline Safety of the number and types of
12 tests proposed by the operator.

13 ii. Notify the Office of Pipeline Safety of the date and time of any
14 laboratory tests at least twenty days before the tests are done.

15 iii. At the request of the Office of Pipeline Safety, ensure that a
16 representative of the Office of Pipeline Safety is permitted to
17 observe any or all of the tests.

18 iv. Ensure that the original laboratory test results are provided to the
19 Office of Pipeline Safety within thirty days of the completion of
20 the tests.

21 v. Pay for the laboratory testing.

22 4. In determining a laboratory pursuant to paragraph 3, subparagraph a, item
23 1, subsection (3)(a)(i), the Office of Pipeline Safety shall:

- a. Submit a written request to at least three different laboratories for bids to conduct the testing.
- b. Consider the qualifications of the respondent laboratories to perform the testing, including:
 - i. Past experience in performing the required test or tests according to ASTM International standards.
 - ii. Any recognition that the laboratory may demonstrate with national or international laboratory accreditation bodies.
- c. Select the laboratory that offers the optimum balance between cost and demonstrated ability to perform the required test or tests.
- d. The Office of Pipeline Safety shall not select a laboratory pursuant to this ~~paragraph~~ subsection before either of the following, which ever occurs first:
 - i. The Office of Pipeline Safety has received written bids from at least three different laboratories.
 - ii. Thirty days from the date of the request for bids has passed.

~~S. T.~~ All repair work performed on an existing intrastate pipeline transporting LNG, hazardous liquids, natural gas or other gas ~~pipeline system~~ will comply with the provisions of this Article.

~~T. U.~~ The Commission may waive compliance with any of the aforementioned parts upon a finding that such a waiver is in the interest of public and pipeline safety.

~~U. V.~~ To ensure compliance with provisions of this rule the Commission or an authorized representative thereof may enter the premises of an operator of an

1 intrastate pipeline to inspect and investigate the property, books, papers, business
2 methods, and affairs that pertain to the pipeline system operation.

3 **V. W.** All other Commission administrative rules are superseded to the extent they are in
4 conflict with the pipeline safety provisions of this Article.
5

6 **R14-5-203. Pipeline Incident Reports and Investigations**

7 **A.** Applicability. This rule applies to all intrastate pipeline systems.

8 **B.** Required incident reports by telephone:

9 1. Operators of an intrastate pipeline transporting LNG, natural gas or other
10 gas ~~pipeline system~~ will notify by telephone the Office of Pipeline Safety
11 immediately upon discovery of the occurrence of any of the following:

- 12 a. The release of natural gas, other gas or liquefied natural gas (LNG)
13 from a pipeline or LNG facility, when any of the following results:
14 i. Death or personal injury requiring hospitalization.
15 ii. An explosion or fire not intentionally set by the operator.
16 iii. Property damage, including the value of the gas lost,
17 estimated in excess of \$5,000.
18
19 b. Emergency transmission pipeline shutdown.
20
21 c. News media inquiry.
22
23 d. Overpressure of a pipeline system where a pipeline operating at
24 less than 12 PSIG exceeds MAOP by 50%, where a pipeline
25 operating between 12 PSIG and 60 PSIG exceeds MAOP by 6
26
27
28

1 PSIG or where a pipeline operating over 60 PSIG exceeds MAOP
2 plus 10%.

- 3 e. Permanent or temporary discontinuance of gas service to a master
4 meter system or when assisting with the isolation of any portion of
5 a gas master meter system due to a failure of a leak test.
6
7 f. Emergency shutdown of a LNG process or storage facility.

8 2. Operators of an intrastate pipeline transporting hazardous liquid will
9 notify by telephone the Office of Pipeline Safety immediately upon
10 discovery of the occurrence of any of the following:

- 11 a. Death or personal injury requiring hospitalization.
12 b. An explosion or fire not intentionally set by the operator.
13 c. Property damage estimated in excess of \$5,000.
14 d. Pollution of any land, stream, river, lake, reservoir, or other body
15 of water that violates applicable environmental quality, water
16 quality standards, causes a discoloration of the surface of the water
17 or adjoining shoreline, or deposits sludge or emulsion beneath the
18 surface of the water or upon adjoining shorelines.
19
20 e. News media inquiry.
21 f. Release of 5 gallons (19 liters) or more of hazardous liquid or
22 carbon dioxide, except that no report is required for a release of
23 less than 5 barrels (0.8 cubic meters) resulting from a pipeline
24 maintenance activity if the release is:
25

- 26 i. Not otherwise reportable under this section;
27
28

ii. Not one described in 49 CFR 195.52(a)(4);
(1994 Revision and no future revisions),
incorporated by reference ~~and on file with the~~
~~Office of the Secretary of State~~ and copies
available from the ~~Commission~~ Office of
Pipeline Safety, 1200 West Washington,
Phoenix, Arizona 85007 2200 North Central
Avenue, Suite 300, Phoenix, Arizona 85004.

iii. Confined to company property or pipeline right-
of-way; and

iv. Cleaned up promptly.

g. Any release of hazardous liquid or carbon dioxide, that was
significant in the judgment of the operator even though it did not
meet the criteria ~~of any other paragraph~~ of this subsection.

3. Telephone incident reports will include the following information:

- a. Name of the pipeline system operator,
- b. Name of the reporting party,
- c. Job title of the reporting party,
- d. The reporting party's telephone number,
- e. Location of the incident,
- f. Time of the incident, and
- g. Fatalities and injuries, if any.

C. Require written incident report:

1. Operators of an intrastate pipeline transporting natural gas, LNG or other gases will file a written incident report when an incident occurs involving a natural gas or other gas pipeline that results in any of the following:
 - a. An explosion or fire not intentionally set by the operator.
 - b. Injury to a person that results in 1 or more of the following:
 - i. Death.
 - ii. Loss of consciousness.
 - iii. Need for medical treatment requiring hospitalization.
 - c. Property damage, including the value of the lost gas, estimated in excess of \$5,000.
 - d. Emergency transmission pipeline shutdown.
 - e. Overpressure of a pipeline system where a pipeline operating at less than 12 PSIG exceeds MAOP by 50%, where a pipeline operating between 12 PSIG and 60 PSIG exceeds MAOP by 6 PSIG or where a pipeline operating over 60 PSIG exceeds MAOP plus 10%.
 - f. Emergency shutdown of a LNG process or storage facility.
2. Written incident reports concerning natural gas or other gas pipeline systems will be in the following form:
 - a. RSPA F7100.1 - Distribution System: Incident Report, incorporated by reference ~~and on file with the Office of the Secretary of State~~ and copies available from the Commission Office of Pipeline Safety, ~~1200 West Washington, Phoenix,~~

~~Arizona 85007~~ 2200 North Central Avenue, Suite 300, Phoenix,
Arizona 85004.

b. RSPA F7100.2 - Transmission and Gathering System: Incident Report, incorporated by reference ~~and on file with the Office of the Secretary of State~~ and copies available from the Commission Office of Pipeline Safety, ~~1200 West Washington, Phoenix,~~ ~~Arizona 85007~~ 2200 North Central Avenue, Suite 300, Phoenix, Arizona 85004.

c. Written incident reports with respect to LNG facilities will be in an investigative form defining the incident and corrective action taken to prevent a reoccurrence.

3. Operators of an intrastate pipeline transporting hazardous liquid will make a written incident report on RSPA F 7000-1, (January 2001 Revision and no future revisions), incorporated by reference ~~and on file with the Office of the Secretary of State,~~ and copies available from the Commission Office of Pipeline Safety, ~~1200 West Washington, Phoenix~~ ~~Arizona 85007~~ 2200 North Central Avenue, Suite 300, Phoenix, Arizona 85004, when there is a release of hazardous liquid which results in any of the following:

- a. An explosion or fire not intentionally set by the operator.
- b. Injury to a person that results in 1 or more of the following:
 - i. Death.
 - ii. Loss of consciousness.
 - iii. Inability to leave the scene of the incident unassisted.

- 1 iv. Need for medical treatment.
- 2 v. Disability which interferes with a person's normal daily
- 3 activities beyond the date of the incident.
- 4 c. Release of 5 gallons (19 liters) or more of hazardous liquid or
- 5 carbon dioxide, except that no report is required for a release of
- 6 less than 5 barrels (0.8 cubic meters) resulting from a pipeline
- 7 maintenance activity if the release is:
- 8 i. Not otherwise reportable under this section;
- 9 ii. Not one described in 49 CFR 195.52 (a)(4); (1994
- 10 Revision and no future revisions), incorporated by
- 11 reference ~~and on file with the Office of the~~
- 12 ~~Secretary of State~~ and copies available from the
- 13 ~~Commission~~ Office of Pipeline Safety, ~~1200 West~~
- 14 ~~Washington, Phoenix, Arizona 85007~~ 2200 North
- 15 Central Avenue, Suite 300, Phoenix, Arizona
- 16 85004.
- 17 iii. Confined to company property or pipeline right-of-
- 18 way; and
- 19 iv. Cleaned up promptly.
- 20 d. Estimated property damage, including cost of clean-up and
- 21 recovery, value of lost product, and damage to the property of the
- 22 operator or others, or both, exceeding \$5,000.
- 23 e. News media inquiry.
- 24
- 25
- 26
- 27
- 28

- 1 4. Written incident reports as required in this Section will be filed with the
2 Office of Pipeline Safety, within the time specified below:
 - 3 a. Natural gas, LNG or other gas - within 20 days after detection.
 - 4 b. Hazardous liquids - within 15 days after detection.
- 5 5. The Operators shall also file a copy of all DOT required written incident
6 reports with the Information Resources Manager, Office of Pipeline
7 Safety, Research and Special Programs Administration, U.S. Department
8 of Transportation, Washington, DC 20590.
- 9 6. Operators of a natural gas or other gas pipeline system will request a
10 clearance from the Office of Pipeline Safety prior to turning on or
11 reinstating service to a master meter operator.

12
13
14 **D. Investigations by the Commission:**

- 15 1. The Office of Pipeline Safety will investigate the cause of incidents
16 resulting in death or serious injury.
- 17 2. Pursuant to an investigation under this rule, the Commission, or an
18 authorized agent thereof, may:
 - 19 a. Inspect all plant and facilities of a pipeline system.
 - 20 b. Inspect all other property, books, papers, business methods, and
21 affairs of a pipeline system.
 - 22 c. Make inquiries and interview persons having knowledge of facts
23 surrounding an incident.
 - 24 d. Attend, as an observer, hearings and formal investigations
25 concerning pipeline system operators.

- e. Schedule and conduct a public hearing into an incident.
3. The Commission may issue subpoenas to compel the production of records and the taking of testimony.
4. Incidents not reported in accordance with the provisions of this rule will be investigated by the Office of Pipeline Safety.
5. Incidents referred to in incomplete or inaccurate reports will be investigated by the Office of Pipeline Safety.
6. Late filed incident reports will be accompanied by a letter of explanation. Incidents referred to in late filed reports may be investigated by the Office of Pipeline Safety.

R14-5-204. Annual Reports

A. Except for operators of an intrastate pipeline transporting LNG, ~~hazardous liquid~~, all other intrastate pipeline operators will file with the Office of Pipeline Safety, not later than March 15, for the preceding calendar year, the following appropriate report(s):

1. RSPA F 7000-1.1 (February 2004 Edition and no future editions) – “Annual Report for calendar year 20 __, hazardous liquid or carbon dioxide systems” and “Instructions for completing RSPA F 7000-1.1 Annual Report for calendar year 20 __ hazardous liquid or carbon dioxide systems incorporated by reference, on file with the Secretary of State and copies available from the Commission Office of Pipeline Safety, 2200 North Central Avenue, Suite 300, Phoenix, Arizona 85004 and the Information Resources Manager, Office of Pipeline Safety, U.S.

1 Department of Transportation, Room 2335, 400 Seventh Street, S.W.,
2 Washington, DC 20590.

- 3 1.2. RSPA F7100.1-1 (November 1985 Edition for use in 2004; March 2005
4 Edition and no future editions, which can be used in 2004 but will become
5 mandatory starting in 2005) - "Annual Report for Calendar Year 20____,
6 Gas Distribution System" and "Instructions for Completing RSPA Form
7 F7100.1-1, Annual Report for Calendar Year 20____, Gas Distribution
8 System", incorporated by reference, ~~on file with the Office of the~~
9 ~~Secretary of State~~, and copies available from the ~~Commission~~ Office of
10 Pipeline Safety, ~~1200 West Washington, Phoenix, Arizona 85007~~ 2200
11 North Central Avenue, Suite 300, Phoenix, Arizona 85004 and the
12 Information Resources Manager, Office of Pipeline Safety, Research and
13 Special Programs Administration, U.S. Department of Transportation,
14 Room 8417, 400 Seventh Street, S.W., Washington, D.C. 20590.

- 4 **B.** The operator will also file a copy of all required annual reports by March 15 to the
5 Information Resources Manager, Office of Pipeline Safety, Research and Special
6 Programs Administration, U.S. Department of Transportation, 400 Seventh Street
7 S.W., Washington, D.C. 20590-0001.
8

9 **R14-5-205. Master Meter System Operators**

- 10 **A.** Applicability. This rule applies to the construction, reconstruction, repair,
11 emergency procedures, operation and maintenance of all master meter systems, as
12 a condition of receiving service from public service corporations. Noncompliance
13 with this rule by operators of a master meter system shall constitute grounds for
14 termination of service by the public service corporation when informed in writing
15 by the Office of Pipeline Safety. In case of an emergency, the Office of Pipeline
16 Safety may give the public service corporation oral instructions to terminate
17 service, with written confirmation to be furnished within 24 hours.
18

- 19 **B.** Subject to the definitional changes in R14-5-201 and the revisions noted in
20 subsection (C), the Commission adopts, incorporates, and approves as its own 49
21 CFR 191 and 192, revised as of ~~January 16, 2002~~ January 15, 2004 (and no future
22 amendments), incorporated by reference, ~~on file with the Office of the Secretary~~
23 ~~of State~~, and copies available from the ~~Commission~~ Office of Pipeline Safety,
24 ~~1200 West Washington, Phoenix, Arizona 85007~~ 2200 North Central Avenue,
25 Suite 300, Phoenix, Arizona 85004 and the United States Government Printing
26
27
28

Office, P.O. Box 371954, Pittsburgh, Pennsylvania 15250-7954 ~~P.O. Box 371975M, Pittsburgh, Pennsylvania 15250-7975.~~

C. The above mentioned incorporated parts of 49 CFR, except Part 191, are revised as follows:

1. Substitute "Commission" where "Administrator of the Research and Special Programs Administration", or "Office of Pipeline Safety" (OPS) appear.
2. Substitute Office of "Pipeline Safety, Arizona Corporation Commission, at its office in Phoenix, Arizona" where the address for the Information Resources Manager, Office of Pipeline Safety, Research and Special Programs Administration, U.S. Department of Transportation appears.

D. Operators of a master meter system will establish an Operation and Maintenance Plan (O & M) including an emergency plan. The plans must be maintained at the master meter system location.

E. Operators of a master meter system will not construct any part of a natural gas or other gas system under a building or permit a building to be placed over a pipeline. Within 180 days of discovery of a building being located over a pipeline, the operator shall remove the building from over the pipeline, relocate the pipeline or discontinue the service to the pipeline located under the building.

F. Operators of a master meter system will not install Acrylonitrile-Butadiene-Styrene (ABS) or aluminum pipe in their systems.

G. Operators of a master meter system will not use solvent cement to join together plastic pipe manufactured from different materials unless the operator utilizes a

1 joining procedure in accordance with the specifications of 49 CFR 192, Subpart F,
2 ~~January 16, 2002~~ January 15, 2004 (and no future amendments), incorporated by
3 reference, ~~on file with the Office of the Secretary of State,~~ and copies available
4 from the ~~Commission~~ Office of Pipeline Safety, ~~1200 West Washington, Phoenix,~~
5 ~~Arizona 85007~~ 2200 North Central Avenue, Suite 300, Phoenix, Arizona 85004
6 and the United States Government Printing Office, P.O. Box 371954, Pittsburgh,
7 Pennsylvania 15250-7954 ~~P.O. Box 371975M, Pittsburgh, Pennsylvania 15250-~~
8 ~~7975.~~
9

10 H. Operators of a master meter system that construct a pipeline or any portion
11 thereof using plastic pipe will install, at a minimum, a 14-gauge coated or
12 corrosion resistant, electrically conductive wire as a means of locating the pipe
13 while it is underground. Tracer wire shall not be wrapped around the plastic pipe,
14 tracer wire may be taped, or attached in some manner to the pipe provided that the
15 adhesive or the attachment is not detrimental to the integrity of the pipe wall.
16

17 I. Operators of a master meter system that construct an underground pipeline using
18 ~~plastic pipe~~ using plastic pipe, will bury the installed pipe with a minimum of 6
19 inches of sandy type soil surrounding the pipe for bedding and shading, free of
20 any rock or debris, unless otherwise protected and approved by the Office of
21 Pipeline Safety. Steel pipe shall be installed with bedding and shading, free of any
22 debris or materials injurious to the pipe coating, unless otherwise protected and
23 approved by the Office of Pipeline Safety.
24

25 J. Operators of a master meter system that construct an underground pipeline using
26 plastic pipe will install the pipe with sufficient slack to allow for thermal
27
28

1 expansion and contraction. ~~In addition, all plastic pipe shall be marked CD or CE~~
2 ~~as required by ASTM D2513-95e~~ In addition, all plastic pipe and fittings shall be
3 marked "Gas" and shall be marked CD, CE, CF or CG as required by ASTM
4 D2513 (1995c Edition and no future editions), incorporated by reference, on file
5 ~~with the Office of the Secretary of State~~ and copies available from the
6 ~~Commission Office of Pipeline Safety, 1200 West Washington, Phoenix, Arizona~~
7 ~~85007~~ 2200 North Central Avenue, Suite 300, Phoenix, Arizona 85004 and
8 ASTM International, 100 Barr Harbor Drive, P.O. Box C700, West
9 Conshohocken, Pennsylvania 19428-2959, the ASTM, 1916 Race Street,
10 Philadelphia, Pennsylvania 19103-1187, for areas where the service temperature
11 is above 100°F.
12

13
14 **K.** Operators of a master meter gas system shall qualify welding procedures and shall
15 perform welding of steel pipelines in accordance with API Standard 1104. Each
16 welder must be qualified in accordance with API Standard 1104, 49 CFR 192,
17 appendix A.

18 **L.** All repair work performed on existing master meter systems will comply with the
19 provisions of this Article.

20 **M.** Operators of a master meter system will not construct any part of a natural gas or
21 other gas system closer than 8 inches to any other underground structure.

22 **N.** Operators of a master meter system will file a Notice of Construction 30 days
23 prior to commencement of the construction of any pipeline. The Notice will
24 contain the following information:
25

- 26 1. The dates of construction,
27
28

2. The size and type of pipe to be used,
3. The location of construction, and
4. The Maximum Allowable Operating Pressure (MAOP).

O. Operators of a master meter system will perform leakage surveys at intervals not exceeding 15 months but at least once each calendar year and will survey and grade all detected leakage by the following guide -- ASME Guide for Gas Transmission and Distribution Pipeline System, Guide Material, Appendix G-11-1983 (1983 Revision and no future revisions), except 4.4(c), incorporated by reference, ~~on file with the Office of the Secretary of State, and copies available from the Commission Office of Pipeline Safety, 1200 West Washington, Phoenix, Arizona 85007~~ 2200 North Central Avenue, Suite 300, Phoenix, Arizona 85004 and the ASME, United Engineering Center, 345 East 47th Street, New York, New York 10017. ("Should" as referenced in the guide will be interpreted to mean "shall".) Leak detection procedures shall be approved by the Office of Pipeline Safety.

P. Laboratory testing of master meter systems shall be conducted in accordance with the following:

1. If an operator of a master meter system, other gas or hazardous liquid pipeline removes a portion of a pipeline that failed for any reason other than observable external corrosion or third party damage, failed pipeline, where the failure is unknown, from as the result of an incident that requires a telephonic or written incident report under R14-5-203(B) or (C), where the cause of the failure is unknown, the operator shall retain the

1 portion that was removed and shall telephonically notify the Office of
2 Pipeline Safety of the removal within two hours after the removal is
3 completed. A notice made pursuant to this ~~paragraph~~ subsection shall
4 include all of the following:

- 5 a. Identity of the failed pipeline.
- 6 b. Description and ~~Location~~ location of the failure.
- 7 c. Date and time of the removal.
- 8 d. Length or quantity of the removed portion.
- 9 e. Storage location of the removed portion.
- 10 f. ~~The operator's opinion regarding the probable cause or causes of~~
11 ~~the failure.~~
- 12 f. Any additional information about the failure or the removal of the
13 portion of the pipeline that failed that is requested by the Office of
14 Pipeline Safety.

15 An unknown failure is any failure where the cause of the failure is not
16 observable external corrosion, third-party damage, natural or other outside
17 forces, construction or material defect, equipment malfunction or incorrect
18 operations; or is any failure where the Office of Pipeline Safety and the
19 operator do not agree as to the cause of the failure.

- 20
- 21
- 22
- 23 2. Within forty-eight hours after telephonic notification pursuant to
24 ~~paragraph~~ subsection (1), the Office of Pipeline Safety shall notify the
25 operator ~~either~~ that either:
- 26
- 27
- 28

- 1 a. The Office of Pipeline Safety is directing the operator to have the
2 portion of the pipeline that was removed tested by a laboratory to
3 determine the cause or causes of the failure; or
4
5 b. The Office of Pipeline Safety is not directing laboratory testing and
6 the operator may discard the portion of the pipeline that was
7 removed.
- 8 3. If the Office of Pipeline Safety directs laboratory testing pursuant to
9 paragraph 2, subparagraph a subsection (2)(a):
- 10 a. The Office of Pipeline Safety shall:
11 i. Determine the laboratory that will do the testing pursuant to
12 paragraph subsection (4) and the period of time within
13 which the testing is to be completed.
14 ii. Approve the number and types of tests to be performed.
15 iii. Notify the operator of its determinations pursuant to items i
16 and ii of this subparagraph subsections (3)(a)(i) and (ii).
17
18 b. The operator shall:
19 i. Notify the Office of Pipeline Safety of the number and
20 types of tests proposed by the operator.
21 ii. Notify the Office of Pipeline Safety of the date and time of
22 any laboratory tests at least twenty days before the tests are
23 done.
24
25
26
27
28

- 1 iii. At the request of the Office of Pipeline Safety, ensure that a
2 representative of the Office of Pipeline Safety is permitted
3 to observe any or all of the tests.
4
5 iv. Ensure that the original laboratory test results are provided
6 to the Office of Pipeline Safety within thirty days of the
7 completion of the tests.
8
9 v. Pay for the laboratory testing.
10
11 4. In determining a laboratory pursuant to ~~paragraph 3, subparagraph a, item~~
12 i subsection (3)(a)(i), the Office of Pipeline Safety shall:
13
14 a. Submit a written request to at least three different laboratories for
15 bids to conduct the testing.
16
17 b. Consider the qualifications of the respondent laboratories to
18 perform the testing, including:
19
20 i. Past experience in performing the required test or tests
21 according to ASTM International standards.
22 ii. Any recognition that the laboratory may demonstrate with
23 national or international laboratory accreditation bodies.
24 c. Select the laboratory that offers the optimum balance between cost
25 and demonstrated ability to perform the required test or tests.
26 d. The Office of Pipeline Safety shall not select a laboratory pursuant to
27 this ~~paragraph~~ subsection before either of the following, which
28 ever occurs first:

i. The Office of Pipeline Safety has received written bids from at least three different laboratories.

ii. Thirty days from the date of the request for bids has passed.

P. Q. Operators of a master meter system will file an annual report with the Commission on Commission Form 1-90/15M (1990 Edition and no future editions), "Annual Report for Calendar Year 20____, Small Operators of Gas Distribution System," incorporated by reference, ~~on file with the Office of the Secretary of State,~~ and copies available from the ~~Commission,~~ Office of Pipeline Safety, ~~1200 West Washington, Phoenix, Arizona 85007~~ 2200 North Central Avenue, Suite 300, Phoenix, Arizona 85004. This report will be filed with the Office of Pipeline Safety not later than April 15 for the preceding calendar year.

Q. R. The Commission may waive compliance with any of the aforementioned parts upon a finding that such a waiver is in the interest of public safety.

R. S. To ensure compliance with provisions of this rule, the Commission or an authorized representative thereof, may enter the premises of an operator of a master meter system to inspect and investigate the property, books, papers, business methods, and affairs that pertain to the operation of the master meter system.

S. T. All other Commission administrative rules are superseded to the extent they are in conflict with the pipeline safety provisions of this Article.

Appendix B**SUMMARY OF THE COMMENTS MADE REGARDING THE RULE AND THE AGENCY
RESPONSE TO THEM****ARTICLE 2. PIPELINE SAFETY****R14-5-202 – Construction and Safety Standards****R14-5-202**

Issue: The Arizona Utility Group ("AUG") comments that Internet addresses should be provided for each agency or entity listed in the rule.

Subsequent to a workshop meeting, Staff and AUG agree to consider this proposal in an upcoming workshop.

Analysis: We agree with AUG and Staff that this issue should be addressed in a future workshop.

Resolution: No change required.

R14-5-202(B)

Issue 1: The AUG comments that the address listed for the U.S. Government Printing Office should be updated to reflect its warehouse services address, which is 8660 Cherry Lane, Laurel, MD 20707.

Staff comments that the address should be changed to P.O. Box 371954, Pittsburgh, Pennsylvania 15250-7954.

Analysis: We agree with Staff. The U.S. Government Printing Office website indicates that orders by mail should be sent to P.O. Box 371954, Pittsburgh, Pennsylvania 15250-7954.

Resolution: Replace "P.O. Box 371975M, Pittsburgh, Pennsylvania 15250-7975" with "P.O. Box 371954, Pittsburgh, Pennsylvania 15250-7954."

1 **Issue 2:** The Secretary of State's Office ("SOS") comments that it will no longer
2 maintain incorporated reference materials on file and therefore, requests that the phrase "on file with
3 the Office of the Secretary of State" be stricken from the final rulemaking package.

4 Staff agrees and states that the phrase "on file with the Office of the Secretary of State"
5 should be stricken.

6 **Analysis:** We agree with Staff and the SOS.

7 **Resolution:** Delete "on file with the Office of the Secretary of State."
8

9 **Issue 3:** The AUG comments that contact information for the Office of the Secretary of
10 State should be provided in the regulation.

11 Staff comments that based upon information from the SOS indicating that it will no longer
12 have incorporated reference materials on file, contact information should not be included in the final
13 rulemaking package.

14 **Analysis:** As it would be confusing to add contact information for an agency no longer
15 maintaining the incorporated referenced materials, we agree with Staff.
16

17 **Resolution:** No change required.

18 **Issue 4:** The AUG comments that the rules utilize inconsistent references to the Office
19 of Pipeline Safety and suggest that references thereto be consistent with R14-5-202(C).

20 Staff Comments that "Office of Pipeline Safety" is defined in R14-5-201 as "the Pipeline
21 Safety personnel for the Commission," and consequently, Staff recommends changing references to
22 the "Commission Office of Pipeline Safety" to "Office of Pipeline Safety" to ensure consistency
23 throughout the rules.
24

25 **Analysis:** We agree with Staff and AUG.

26 **Resolution:** Delete "Commission" immediately preceding "Office of Pipeline Safety."
27
28

R14-5-202(E)(1)

Issue 1: The AUG comments that the address listed for NACE International should be updated to reflect the current address, which is NACE International, 1440 South Creek Drive, Houston, Texas, 77084-4906.

Staff comments that it agrees that the address should be updated.

Analysis: We agree with Staff and AUG.

Resolution: Replace "P.O. Box 218340, Houston, Texas 77218-8340" with "1440 South Creek Drive, Houston, Texas 77084-4906."

Issue 2: The SOS comments that it will no longer maintain incorporated reference materials on file and therefore, requests that the phrase "on file with the Office of the Secretary of State" be stricken from the final rulemaking package.

Staff agrees to the amendment with one exception, addition of the word "and" such that the phrase "and on file with the Office of the Secretary of State" should be stricken.

Analysis: We agree with Staff.

Resolution: Delete "and on file with the Office of the Secretary of State."

Issue 3: The AUG comments that contact information for the Office of the Secretary of State should be provided in the regulation.

Staff comments that based upon information from the SOS indicating that it will no longer have incorporated reference materials on file, contact information should not be included in the final rulemaking package.

Analysis: As it would be confusing to add contact information for an agency no longer maintaining the incorporated referenced materials, we agree with Staff.

Resolution: No change required.

1 **Issue 4:** The AUG comments that the rules utilize inconsistent references to the Office
2 of Pipeline Safety and suggest that references thereto be consistent with R14-5-202(C).

3 Staff Comments that "Office of Pipeline Safety" is defined in R14-5-201 as "the Pipeline
4 Safety personnel for the Commission," and consequently, Staff recommends changing references to
5 the "Commission Office of Pipeline Safety" to "Office of Pipeline Safety" to ensure consistency
6 throughout the rules.

7 **Analysis:** We agree with Staff and AUG.

8 **Resolution:** Delete "Commission" immediately preceding "Office of Pipeline Safety."
9

10 **R14-5-202(E)(2)**

11 **Issue 1:** The AUG comments that the address listed for CSSINFO should be updated to
12 reflect the current address, which is 777 East Eisenhower Parkway, Ann Arbor, MI 48108.

13 Staff comments that it agrees that the address should be changed as proposed by AUG but
14 adds that CSSINFO should be referred to by its new name of Techstreet.

15 **Analysis:** We agree with AUG and Staff that the address should be updated.
16 Furthermore, we agree with Staff that CSSINFO is now known as Techstreet, and the rule should be
17 amended accordingly.
18

19 **Resolution:** Replace "the CSSINFO, 310 Miller Avenue, Ann Arbor, Michigan, 48103"
20 with "Techstreet, 777 East Eisenhower Parkway, Ann Arbor, Michigan 48108."

21 **Issue 2:** The SOS comments that it will no longer maintain incorporated reference
22 materials on file and therefore, requests that the phrase "on file with the Office of the Secretary of
23 State" be stricken from the final rulemaking package.
24

25 Staff agrees to the amendment with one exception, addition of the word "and" such that the
26 phrase "and on file with the Office of the Secretary of State" should be stricken.

27 **Analysis:** We agree with Staff.
28

1 **Resolution:** Delete “and on file with the Office of the Secretary of State.”

2 **Issue 3:** The AUG comments that contact information for the Office of the Secretary of
3 State should be provided in the regulation.

4 Staff comments that based upon information from the SOS indicating that it will no longer
5 have incorporated reference materials on file, contact information should not be included in the final
6 rulemaking package.

7 **Analysis:** As it would be confusing to add contact information for an agency no longer
8 maintaining the incorporated referenced materials, we agree with Staff.

9 **Resolution:** No change required.

10 **Issue 4:** The AUG comments that the rules utilize inconsistent references to the Office
11 of Pipeline Safety and suggest that references thereto be consistent with R14-5-202(C).

12 Staff Comments that “Office of Pipeline Safety” is defined in R14-5-201 as “the Pipeline
13 Safety personnel for the Commission,” and consequently, Staff recommends changing references to
14 the “Commission Office of Pipeline Safety” to “Office of Pipeline Safety” to ensure consistency
15 throughout the rules.

16 **Analysis:** We agree with Staff and AUG.

17 **Resolution:** Delete “Commission” immediately preceding “Office of Pipeline Safety.”

18 **R14-5-202(J)**

19 **Issue 1:** The AUG comments that the address listed for the U.S. Government Printing
20 Office should be updated to reflect its warehouse services address, which is 8660 Cherry Lane,
21 Laurel, MD 20707.

22 Staff comments that the address should be changed to P.O. Box 371954, Pittsburgh,
23 Pennsylvania 15250-7954.

1 **Analysis:** We agree with Staff. The U.S. Government Printing Office website indicates
2 that orders by mail should be sent to P.O. Box 371954, Pittsburgh, Pennsylvania 15250-7954.

3 **Resolution:** Replace "P.O. Box 371975M, Pittsburgh, Pennsylvania 15250-7975" with
4 "P.O. Box 371954, Pittsburgh, Pennsylvania 15250-7954."

5 **Issue 2:** The SOS comments that it will no longer maintain incorporated reference
6 materials on file and therefore, requests that the phrase "on file with the Office of the Secretary of
7 State" be stricken from the final rulemaking package.

8
9 Staff agrees and states that the phrase "on file with the Office of the Secretary of State"
10 should be stricken.

11 **Analysis:** We agree with Staff and the SOS.

12 **Resolution:** Delete "on file with the Office of the Secretary of State."

13 **Issue 3:** The AUG comments that contact information for the Office of the Secretary of
14 State should be provided in the regulation.

15 Staff comments that based upon information from the SOS indicating that it will no longer
16 have incorporated reference materials on file, contact information should not be included in the final
17 rulemaking package.

18
19 **Analysis:** As it would be confusing to add contact information for an agency no longer
20 maintaining the incorporated referenced materials, we agree with Staff.

21 **Resolution:** No change required.

22 **Issue 4:** The AUG comments that the rules utilize inconsistent references to the Office
23 of Pipeline Safety and suggest that references thereto be consistent with R14-5-202(C).
24

25 Staff Comments that "Office of Pipeline Safety" is defined in R14-5-201 as "the Pipeline
26 Safety personnel for the Commission," and consequently, Staff recommends changing references to
27
28

1 the "Commission Office of Pipeline Safety" to "Office of Pipeline Safety" to ensure consistency
2 throughout the rules.

3 **Analysis:** We agree with Staff and AUG.

4 **Resolution:** Delete "Commission" immediately preceding "Office of Pipeline Safety."

5 **R14-5-202(K)**

6 **Issue 1:** The AUG comments that the address listed for the U.S. Government Printing
7 Office should be updated to reflect its warehouse services address, which is 8660 Cherry Lane,
8 Laurel, MD 20707.

9 Staff comments that the address should be changed to P.O. Box 371954, Pittsburgh,
10 Pennsylvania 15250-7954.

11 **Analysis:** We agree with Staff. The U.S. Government Printing Office website indicates
12 that orders by mail should be sent to P.O. Box 371954, Pittsburgh, Pennsylvania 15250-7954.

13 **Resolution:** Replace "P.O. Box 371975M, Pittsburgh, Pennsylvania 15250-7975" with
14 "P.O. Box 371954, Pittsburgh, Pennsylvania 15250-7954."

15 **Issue 2:** The SOS comments that it will no longer maintain incorporated reference
16 materials on file and therefore, requests that the phrase "on file with the Office of the Secretary of
17 State" be stricken from the final rulemaking package.

18 Staff agrees and states that the phrase "on file with the Office of the Secretary of State"
19 should be stricken.

20 **Analysis:** We agree with Staff and the SOS.

21 **Resolution:** Delete "on file with the Office of the Secretary of State."

22 **Issue 3:** The AUG comments that contact information for the Office of the Secretary of
23 State should be provided in the regulation.
24
25
26
27
28

1 Staff comments that based upon information from the SOS indicating that it will no longer
2 have incorporated reference materials on file, contact information should not be included in the final
3 rulemaking package.

4 **Analysis:** As it would be confusing to add contact information for an agency no longer
5 maintaining the incorporated referenced materials, we agree with Staff.

6 **Resolution:** No change required.

7 **Issue 4:** The AUG comments that the rules utilize inconsistent references to the Office
8 of Pipeline Safety and suggest that references thereto be consistent with R14-5-202(C).
9

10 Staff Comments that "Office of Pipeline Safety" is defined in R14-5-201 as "the Pipeline
11 Safety personnel for the Commission," and consequently, Staff recommends changing references to
12 the "Commission Office of Pipeline Safety" to "Office of Pipeline Safety" to ensure consistency
13 throughout the rules.

14 **Analysis:** We agree with Staff and AUG.

15 **Resolution:** Delete "Commission" immediately preceding "Office of Pipeline Safety."
16

17 **R14-5-202(O)**

18 **Issue:** The AUG and El Paso Pipeline Group ("El Paso") comment that Staff's
19 proposal to strike the language "using plastic pipe" in this section expands the rule's application to all
20 pipe, and specifically steel pipe, thereby precluding the use of other adequate options for the
21 protection of steel pipe, which could result in a significant economic impact. AUG comments that
22 instead of striking the phrase "using plastic pipe," the following provision addressing steel pipe
23 should be added at the end of the subsection: "Steel pipe shall be installed with bedding and shading,
24 free of any debris or materials injurious to the pipe coating, unless otherwise protected as allowed by
25 federal regulation or approved by OPS."
26
27
28

1 AUG and El Paso comment that inclusion of the phrase "unless otherwise protected as
2 allowed by federal regulation or approved by OPS" is intended to provide for the use of alternative
3 methods for protecting the pipe from damage. El Paso adds that this treatment is consistent with the
4 federal regulatory language.

5 Staff comments that the concerns expressed by AUG and El Paso are legitimate, that the rule
6 should be modified such that the phrase "using plastic pipe" remains in the rule, and that the language
7 proposed by AUG, and supported by El Paso, should be included with one modification.
8 Specifically, Staff proposes adding the language "unless otherwise protected and approved by the
9 Office of Pipeline Safety" rather than "unless otherwise protected as allowed by federal regulation or
10 approved by OPS" as proposed by AUG and El Paso.

12 **Analysis:** We agree with Staff, AUG, and El Paso that the phrase "using plastic pipe"
13 should remain in the rule. We agree with Staff, however, that the additional language relating to the
14 use of steel pipe should be qualified by the phrase "unless otherwise protected and approved by the
15 Office of Pipeline Safety." AUG's proposed reference to the use of methods approved by federal
16 regulation does not mimic the existing state rule and effectively diminishes the Office of Pipeline
17 Safety's ability to regulate the methodology to be utilized.

19 **Resolution:** Retain the phrase "using plastic pipe," and add "Steel pipe shall be installed
20 with bedding and shading, free of any debris or materials injurious to the pipe coating, unless
21 otherwise protected and approved by the Office of Pipeline Safety" at the end of the subsection.

22 **R14-5-202(P)**

24 **Issue 1:** AUG comments that the reference to ASTM should be updated to reflect the
25 fact that the organization is now referred to as ASTM International.

1 Staff agrees with AUG's comment and adds that the address listed for ASTM should be
2 updated to reflect the new address, which is 100 Barr Harbor Drive, P.O. Box C700, West
3 Conshohocken, Pennsylvania 19428-2959.

4 **Analysis:** We agree with Staff and AUG.

5 **Resolution:** Replace "the ASTM, 1916 Race Street, Philadelphia, Pennsylvania 19103-
6 1187," with "ASTM International, 100 Barr Harbor Drive, P.O. Box C700, West Conshohocken,
7 Pennsylvania 19428-2959."

8 **Issue 2:** AUG comments that the ASTM standard should reflect the identical standard
9 found in the most current issue of the federal rule, which is D2513-87 for 49 CFR 192.63(a)(1) and
10 otherwise D2513-96(a).

11 AUG and Staff agree, however, to discuss updating industry standards in a workshop to be
12 held in the future.

13 **Analysis:** We agree with AUG and Staff that industry standards should be discussed at a
14 future workshop and updated as necessary after a full discussion with the parties has taken place.

15 **Resolution:** No change required.

16 **Issue 3:** The SOS comments that it will no longer maintain incorporated reference
17 materials on file and therefore, requests that the phrase "on file with the Office of the Secretary of
18 State" be stricken from the final rulemaking package.

19 Staff agrees and states that the phrase "on file with the Office of the Secretary of State"
20 should be stricken.

21 **Analysis:** We agree with Staff and the SOS.

22 **Resolution:** Delete "on file with the Office of the Secretary of State."
23
24
25
26
27
28

1 **Issue 4:** The AUG comments that contact information for the Office of the Secretary of
2 State should be provided in the regulation.

3 Staff comments that based upon information from the SOS indicating that it will no longer
4 have incorporated reference materials on file, contact information should not be included in the final
5 rulemaking package.

6 **Analysis:** As it would be confusing to add contact information for an agency no longer
7 maintaining the incorporated referenced materials, we agree with Staff.

8 **Resolution:** No change required.

9
10 **Issue 5:** The AUG comments that the rules utilize inconsistent references to the Office
11 of Pipeline Safety and suggest that references thereto be consistent with R14-5-202(C).

12 Staff Comments that "Office of Pipeline Safety" is defined in R14-5-201 as "the Pipeline
13 Safety personnel for the Commission," and consequently, Staff recommends changing references to
14 the "Commission Office of Pipeline Safety" to "Office of Pipeline Safety" to ensure consistency
15 throughout the rules.

16
17 **Analysis:** We agree with Staff and AUG.

18 **Resolution:** Delete "Commission" immediately preceding "Office of Pipeline Safety."

19 **Issue 6:** AUG comments that Staff's proposed language will require that all plastic pipe
20 and fittings be marked both "Gas" and CD, CE, CF, or CG, which exceeds the 1995 standards set
21 forth by the American Society for Testing and Materials ("ASTM") D2513. AUG comments that the
22 proposed requirements will impose an unnecessary economic burden on pipeline operators given the
23 need to obtain the required changes to current markings.

24
25 Staff comments that it agrees that the economic impact of having plastic pipe and fittings
26 marked "Gas" significantly outweighs the benefit and that having the plastic pipe and fittings marked
27 CD, CE, CF, or CG will ensure the public safety. Accordingly, Staff and AUG agree to the deletion
28

1 of the phrase "shall be marked 'Gas' and" such that the subsection should read, "In addition, all
2 plastic pipe and fittings shall be marked CD, CE, CF or CG as required by ASTM D2513."

3 **Analysis:** We agree with Staff and AUG.

4 **Resolution:** Delete "shall be marked 'Gas' and."

5 **R14-5-202(R)**

6 **Issue 1:** The SOS comments that it will no longer maintain incorporated reference
7 materials on file and therefore, requests that the phrase "on file with the Office of the Secretary of
8 State" be stricken from the final rulemaking package.
9

10 Staff agrees to the amendment with one exception, addition of the word "and" such that the
11 phrase "and on file with the Office of the Secretary of State" should be stricken.

12 **Analysis:** We agree with Staff.

13 **Resolution:** Delete "and on file with the Office of the Secretary of State."

14 **Issue 2:** The AUG comments that contact information for the Office of the Secretary of
15 State should be provided in the regulation.
16

17 Staff comments that based upon information from the SOS indicating that it will no longer
18 have incorporated reference materials on file, contact information should not be included in the final
19 rulemaking package.

20 **Analysis:** As it would be confusing to add contact information for an agency no longer
21 maintaining the incorporated referenced materials, we agree with Staff.

22 **Resolution:** No change required.

23 **Issue 3:** The AUG comments that the rules utilize inconsistent references to the Office
24 of Pipeline Safety and suggest that references thereto be consistent with R14-5-202(C).
25

26 Staff Comments that "Office of Pipeline Safety" is defined in R14-5-201 as "the Pipeline
27 Safety personnel for the Commission," and consequently, Staff recommends changing references to
28

1 the "Commission Office of Pipeline Safety" to "Office of Pipeline Safety" to ensure consistency
2 throughout the rules.

3 **Analysis:** We agree with Staff and AUG.

4 **Resolution:** Delete "Commission" immediately preceding "Office of Pipeline Safety."

5 **Issue 4:** The AUG comments that the rule's reference the American Society of
6 Mechanical Engineer's ("ASME") Guide material in Appendix G-11-1983 is, in part, outdated and
7 incorrect given a number of changes to the federal regulation. AUG further comments that although
8 Appendix G-11 is used nationally by natural gas operators, it is utilized as a guide and may not,
9 therefore, be applicable in all circumstances for all operators. AUG comments that the ASME was
10 superseded by the AGA's Gas Pipeline Technology Committee, which was approved by the
11 American National Standards Institute ("ANSI") Gas Pipeline and Technology Committee ("GPTC")
12 Z380.1 in December 1992. Consequently, AUG argues that the most current version of the
13 ANSI/GPTC Z380.1 guide material should be incorporated by reference.
14

15 Staff comments that updating the industrial standards is not always beneficial to the public
16 safety. Consequently, Staff comments that certain industrial standards referenced in the Rules should
17 not be updated at this time but that such an update might be appropriate in a subsequent rulemaking if
18 it is in the public interest. Staff comments that AUG has agreed to defer such an update of certain
19 industrial standards until the parties have had the opportunity to discuss the ramifications of so doing.
20

21 **Analysis:** We agree that any updates should be deferred until such time as the parties
22 have had an opportunity to fully consider whether such updates would serve the public interest.
23

24 **Resolution:** No change required.

25 **R14-5-202(S)**

26 **Issue:** The SOS comments that references to "paragraph," "subparagraph" or "item" should
27 be changed to "subsection" to conform to the Arizona Rulemaking manual.
28

Staff agrees and recommends conforming changes to utilize the term "subsection."

Analysis: We agree with the SOS and Staff.

Resolution: Replace all references to "paragraph," "subparagraph" and "item" with "subsection."

R14-5-202(S)(1)

Issue: Staff, SWG, AUG, and UNS comment that disagreements regarding the language in this subsection relating to laboratory testing have been resolved by discussions amongst the parties resulting in the following consensus language, which should replace all prior manifestations of the rule:

S. Laboratory testing of intrastate pipelines shall be conducted in accordance with the following:

1. If an operator of an intrastate natural gas, other gas or hazardous liquid pipeline removes a portion of a failed pipeline from an incident that requires a telephonic or written incident report under R14-5-203(B) or (C), where the cause of the failure is unknown, the operator shall retain the portion that was removed and shall telephonically notify the Office of Pipeline Safety of the removal within two hours after the removal is completed. A notice made pursuant to this subsection shall include all of the following:
 - a. Identity of the failed pipeline.
 - b. Description and location of the failure.
 - c. Date and time of the removal.
 - d. Length or quantity of the removed portion.
 - e. Storage location of the removed portion.
 - f. Any additional information about the failure or the removal of the portion of the pipeline that failed that is requested by the Office of Pipeline Safety.

An unknown failure is any failure where the cause of the failure is not observable external corrosion, third-party damage, natural or other outside forces, construction or material defect, equipment malfunction or incorrect operations; or is any failure where the Office of Pipeline Safety and the operator do not agree as to the cause of the failure.

Analysis: The proposed amendment represents consensus language addressing concerns raised by industry representatives. Specifically, there was concern that the term "failure," as it

1 originally appeared in Staff's proposed amendment, was not defined and therefore, not specific
2 enough to discern what constitutes a reportable incident. Additionally, the industry representatives
3 were concerned that this lack of specificity could result in daily reporting of minor incidents that
4 occur in the normal course of business and do not warrant testing as originally proposed.

5 Additionally, the consensus language addresses the industry's concern, as specifically
6 expressed by AUG, that the new notice requirements originally proposed by Staff do not relate back
7 to the existing notice requirements as set forth in R14-5-203.

8 We agree with Staff, SWG, AUG, and UNS. We believe that the consensus language
9 provides the required clarification for implementation of the rule while simultaneously reserving
10 OPS' right to receive notification of the removal of a failed pipeline such that OPS may then make a
11 determination as to whether further investigation and testing of the failed portion of pipeline should
12 be undertaken.

13 We believe, however, that two minor modifications in the language of the proposed rule
14 would provide clarity. Specifically, subsection (1) should be amended by inserting the phrase "where
15 the cause of the failure is unknown" immediately after "failed pipeline," and subsequently, the word
16 "from" should be replaced with the phrase "as the result of" such that the sentence reads as follows:
17 "If an operator of an intrastate natural gas, other gas or hazardous liquid pipeline removes a portion
18 of a failed pipeline, where the cause of the failure is unknown, as the result of an incident that
19 requires a telephonic or written incident report under R14-5-203(B) or (C), the operator shall retain
20 the portion that was removed and shall telephonically notify the Office of Pipeline Safety of the
21 removal within two hours after the removal is completed."

22 **Resolution:** Amend 202(S)(1) to read as follows:

23 S. Laboratory testing of intrastate pipelines shall be conducted in accordance with the
24 following:

25 1. If an operator of an intrastate natural gas, other gas or hazardous liquid
26
27
28

pipeline removes a portion of a failed pipeline, where the cause of the failure is unknown, as the result of an incident that requires a telephonic or written incident report under R14-5-203(B) or (C), the operator shall retain the portion that was removed and shall telephonically notify the Office of Pipeline Safety of the removal within two hours after the removal is completed. A notice made pursuant to this subsection shall include all of the following:

- a. Identity of the failed pipeline.
- b. Description and location of the failure.
- c. Date and time of the removal.
- d. Length or quantity of the removed portion.
- e. Storage location of the removed portion.
- f. Any additional information about the failure or the removal of the portion of the pipeline that failed that is requested by the Office of Pipeline Safety.

An unknown failure is any failure where the cause of the failure is not observable external corrosion, third-party damage, natural or other outside forces, construction or material defect, equipment malfunction or incorrect operations; or is any failure where the Office of Pipeline Safety and the operator do not agree as to the cause of the failure.

R14-5-202(S)(2)

Issue: SWG comments, and AUG agrees, that the language of the rule should be amended to read as follows:

2. Within forty-eight hours after telephonic notification pursuant to subsection (1), the Office of Pipeline Safety shall notify the operator either that:
 - a. The Office of Pipeline Safety is directing the operator to have the portion of the pipeline that was removed tested by a third-party laboratory to determine the cause or causes of the failure; or
 - b. The Office of Pipeline Safety is not directing the operator to conduct third-party laboratory testing and the operator may discard the portion of the pipeline that was removed.

The Office of Pipeline Safety shall confirm its notification in writing.

Staff comments that it does not support this proposed language.

Analysis: We agree with Staff with regard to SWG's proposed language referencing a third-party laboratory. This language was presumably added in conjunction with SWG's additional amendments to subsection (S)(3), by which SWG proposes that the operator be responsible for

1 determining the laboratory to be used such that it would be necessary to specify that a third party
2 laboratory, rather than the operator's, would be utilized. It is, however, unnecessary and redundant to
3 add such language as the laboratory to be utilized pursuant to the rule will necessarily be a third-party
4 laboratory chosen by, but not under the control of, the OPS.

5 We disagree with Staff, however, with regard to the insertion of the word "telephonic" and
6 with regard to the additional language directing the Office of Pipeline Safety to confirm its
7 notification in writing. Clarifying that the notification pursuant to subsection (1) is telephonic in
8 nature creates consistency among the subsections. Additionally, requiring the OPS to confirm the
9 telephonic notification in writing is not unduly burdensome, would improve clarity, and eliminate
10 any dispute as to whether telephonic notification had been effected.

12 Additionally, we believe that the word "that" should be moved and inserted between the
13 words "operator" and "either" in the second line of the subsection.

14 **Resolution:** Amend 202(S)(2) to read as follows:

- 15 2. Within forty-eight hours after telephonic notification pursuant to subsection
16 (1), the Office of Pipeline Safety shall notify the operator that either:
- 17 a. The Office of Pipeline Safety is directing the operator to have the
18 portion of the pipeline that was removed tested by a laboratory to
19 determine the cause or causes of the failure; or
 - 20 b. The Office of Pipeline Safety is not directing laboratory testing and the
21 operator may discard the portion of the pipeline that was removed.

22 The Office of Pipeline Safety shall confirm its notification in writing.

23 **R14-5-202(S)(3)**

24 **Issue 1:** SWG comments that if OPS dictates the means and methods of a material
25 investigation, it assumes civil liability as an operator if the investigation is negligently performed.
26 Specifically, SWG comments that the OPS functions contemplated by the proposed rule have long
27 been recognized by the federal law as being intimately associated with the operation and maintenance
28 of a pipeline system, and the operator's negligent failure to comply with these legal requirements

1 exposes the operator to suit for civil liability when that negligence proximately results in injury.

2 In a subsequent reply to Staff's responsive comments, SWG adds that it is reasonable to
3 expect the OPS to be a defendant in any litigation following a significant incident in which it can be
4 alleged that OPS bears some responsibility. In support of this contention, SWG adds that the
5 Commission is currently a defendant in a personal injury lawsuit relating to an incident involving the
6 release and ignition of natural gas.

7 Staff comments that the proposed laboratory testing rules do not make OPS an operator. An
8 operator is defined in the federal rules as being "a person who engages in the transportation of gas,"
9 and these federal rules were adopted in Arizona pursuant to A.A.C. R14-5-202(B). Neither OPS nor
10 Staff will be engaged in the transportation of gas, and expanding the role of the OPS to include the
11 selection of a laboratory does not make OPS an operator. Finally, Staff comments that although risk
12 of litigation exists, it does not outweigh the benefits offered by passage of the amended rule.

13 **Analysis:** We agree with Staff that the oversight benefits offered by the amended rule
14 outweigh the potential risk of litigation. As pointed out by SWG, the Commission currently occupies
15 a supervisory role that may result in litigation notwithstanding the proposed amendment. Expanding
16 the Commission's oversight role in this arena may result in a greater risk of litigation, but it is as
17 likely that the Commission would be subject to the same litigation absent any additional oversight of
18 future pipeline failure. Finally, while we acknowledge the risk of litigation based upon the OPS'
19 oversight of testing facilities and methods, we do not believe that liability will arise as a consequence
20 of the OPS being deemed an "operator."

21 **Resolution:** No change required.

22 **Issue 2:** SWG comments that OPS, unlike a federal agency, will not be immune to civil
23 liability for its negligent determination of the means and methods of a material investigation as
24 Arizona has abrogated its sovereign immunity for instruments of the state government in all instances
25
26
27
28

1 not within the narrow exceptions listed in A.R.S. § 12-820 through § 12-826.

2 SWG adds, however, that if a Commission administrative law judge were to adjudicate,
3 pursuant to the Commission's Rules of Practice and Procedure, a discovery dispute related to the
4 number and/or types of tests to be performed, the Commission would likely be insulated from civil
5 liability to injured persons as some form of judicial immunity would probably apply to the judicial
6 function.

7
8 Staff comments that Arizona courts have recognized that immunity still exists in those
9 instances where dismissing immunity would hamper achievement of important governmental
10 objectives. Staff further comments that absolute immunity will apply when the government is
11 performing administrative functions involving fundamental governmental policy. The purpose of
12 these laboratory testing rules is for the public health and safety, and the decision to require
13 independent laboratory testing chosen by the OPS involved considerable thought and discretion that
14 renders approval of these proposed rules equivalent to fundamental governmental policy. As such, if
15 the Commission promulgates these rules, it will be protected by absolute immunity.
16

17 Staff comments that although absolute immunity is not as clear in terms of the
18 implementation of the rules, liability would be predicated upon a showing of duty, breach, and
19 proximate cause even if absolute immunity did not apply. Staff believes that the decision to adopt the
20 laboratory testing rules should be based upon an analysis of whether the rules will advance the public
21 safety rather than the possibility of liability. Staff adds that it believes the benefits of these laboratory
22 testing rules outweigh the costs.
23

24 **Analysis:** We agree with Staff that the adoption of the laboratory testing rules should be
25 based upon the advancement of public safety when this benefit is shown to outweigh the costs of
26 potential litigation. While it appears that implementation of the rules could potentially expose the
27 Commission to civil liability, it is not clear the extent to which the Commission would be insulated
28

from such liability should discovery disputes be adjudicated by a Commission administrative law judge. Moreover, any potential immunity derived from the Commission's judicial function would conceivably be limited to alleged negligence arising from the limited issue subject to adjudication and may not provide blanket protection. In the absence of a significantly diminished probability that liability would attach, we believe that the process of laboratory and test selection should not be delayed by administrative adjudication, and the OPS should be the entity responsible for the final decision should a dispute arise.

Resolution: No change required.

Issue 3: SWG comments, and AUG agrees, that the language of the rule should be amended to read as follows:

3. If the Office of Pipeline Safety directs third-party laboratory testing pursuant to subsection (2)(a);
 - a. The Office of Pipeline Safety shall:
 - i. ~~Determine the laboratory that will do the testing pursuant to subsection (4) and the period of time within which the testing is to be completed.~~
 - ii. ~~Approve the number and types of tests to be performed.~~
 - iii. ~~Notify the operator of its determination pursuant to subsections 3(a)(i) and (ii) if additional or alternative tests are required.~~
 - ii. Notify the operator if representatives from the Office of Pipeline Safety and any of its consultants will observe or record any or all of the tests.
 - b. The operator shall:
 - i. Notify the Office of Pipeline Safety of the identity of the third-party laboratory. In choosing a third-party laboratory, the operator shall consider the qualifications of the laboratory to perform the testing, including:
 1. Past experience in performing the required test or tests according to ASTM International standards.
 2. Any recognition that the laboratory may demonstrate with national or international laboratory accreditation bodies.
 - i. ii. Notify the Office of Pipeline Safety of the number and types of tests proposed by the operator.
 - ii. iii. Notify the Office of Pipeline Safety of the location, date and time of any third-party laboratory tests at least twenty days before the tests are done.
 - iv. Respond to the Office of Pipeline Safety regarding any required

- alternative or additional tests pursuant to subsection (3)(a)(i).
- iii. v. At the request of the Office of Pipeline Safety, ensure that a representatives of the Office of Pipeline Safety is and any of its consultants are permitted to observe and record any or all of the tests.
- iv. vi. Ensure that the original third-party laboratory test ~~results are~~ report is provided to the Office of Pipeline Safety within thirty days of the ~~completion of the test~~ operator's receipt of the report.
- v. Pay for the laboratory testing.

Staff comments that it does not support this proposed language.

Analysis: We agree with Staff. The language proposed by SWG effectively eliminates OPS' authority to determine both the laboratory that will undertake the testing as well as the number and types of tests to be performed.

Resolution: No change required.

Issue 4: SWG comments that when the OPS acts as an operator pursuant to the powers granted by the proposed rule, these activities will have the effect of preventing the operator from performing some of its operational obligations as set forth in 49 CFR § 192.617, which in turn jeopardizes the OPS' federal certification for gas or hazardous liquid under 49 U.S.C. § 60105(a) as well as its federal grant-in-aid funds. SWG adds that 49 U.S.C. § 60104(c) provides, “[a] State authority that has submitted a current certification under section 60105(a) of this title may adopt additional or more stringent safety standards for intrastate pipeline facilities and intrastate pipeline transportation only if those standards are compatible with the minimum standards prescribed” in the Code of Federal Regulations.

Staff comments that the proposed rules are not incompatible with 49 CFR 192.617, which states that “[e]ach operator shall establish procedures for analyzing accidents and failures, including the selection of samples of the failed facility or equipment for laboratory examination, where appropriate, for the purpose of determining the causes of the failure and minimizing the possibility of a recurrence.” Staff states that OPS’ selection of the laboratory and tests to be performed does not

1 conflict with this federal provision. Rather, SWG must establish procedures that incorporate and
2 work within the framework of the proposed laboratory testing rules. Finally, Staff comments that
3 because the two regulations can and should be read in harmony, the rule should be amended as
4 proposed.

5 **Analysis:** We agree with Staff that the provisions of R14-2-202(S)(3) are not
6 incompatible with the minimum federal safety standards as set forth in 49 CFR 192.617 and
7 consequently, that 49 USC § 60104(c) permits a State authority to “adopt additional or more stringent
8 safety standards for intrastate pipeline facilities and intrastate pipeline transportation.” Given that 49
9 CFR 192.617 requires an operator to establish procedures, rather than dictating the procedures to be
10 utilized, we agree with Staff that the operator can establish procedures that incorporate and operate
11 within this proposed rule.
12

13 **Resolution:** No change required.

14 **Issue 5:** The City of Mesa comments that subsection (a)(i) directs the OPS to determine
15 the laboratory that will do the necessary testing thereby excluding the operator from the selection
16 process, which may create problems for the City as it is governed by bidding requirements relating to
17 the expenditure of public funds. Specifically, the City of Mesa notes that it could be problematic if
18 the state chooses to utilize the higher of two bids submitted by laboratories performing the same
19 service. The City of Mesa further commented that it was in the process of seeking a ruling on this
20 issue and would submit any such ruling as soon as it was obtained.
21

22 AUG comments that OPS’ selection of the laboratory in conjunction with subsection (b)(v),
23 which requires the operator to pay for the testing, may violate the procurement laws for municipal or
24 governmental entities.
25

26 Staff comments that the issue requires consideration as it was not specifically taken into
27 account in this rulemaking, yet Staff further comments that it does not believe that the concerns
28

1 expressed by the City of Mesa are directly in conflict with the proposed amendment to the rule.

2 **Analysis:** We agree with Staff. The City of Mesa did not provide demonstrable
3 evidence, in the form of a ruling, that payment by the operator violates its procurement laws, and
4 consequently, the issue has not been shown to be in direct conflict with the proposed rule. It is,
5 however, an issue which requires further consideration by the parties at a future workshop.

6 **Resolution:** No change required.

7 **Issue 6:** AUG comments that there could be legal conflicts with the state becoming
8 involved in the selection of laboratories and types of tests, especially in those instances where
9 litigation is involved. AUG further comments that increased legal liabilities that may result from this
10 may be too great for industry to bear.

11 Staff comments that as the primary agency for regulating pipeline safety within the state, it is
12 appropriate for OPS to directly regulate laboratory testing and that it is in the public interest and
13 ensures public safety to do so.

14 **Analysis:** We agree with Staff. AUG's comments are speculative and do not present a
15 demonstrable cost that outweighs the benefit to the public safety afforded by granting authority to
16 OPS to select the laboratory and type of tests to be conducted.

17 **Resolution:** No change required.

18 **Issue 7:** El Paso comments that the role delineated in the rule for OPS, namely
19 determining the facility to be used and overseeing laboratory testing, should be limited to those
20 instances in which the damage is the result of an "incident" rather than a mere "failure," and it is
21 discovered that the operator's facilities are not appropriate or that the testing cannot occur in a timely
22 fashion.

23 Staff comments that as the primary agency for regulating pipeline safety within the state, it is
24 appropriate for OPS to directly regulate laboratory testing and that it is in the public interest and
25

1 ensures public safety to do so.

2 **Analysis:** We agree with Staff that OPS is the appropriate entity to maintain control over
3 the selection of laboratory and testing of materials.

4 **Resolution:** No change required.

5 **R14-5-202(S)(3)(b)(v)**

6 **Issue:** SWG comments that this subsection requires an operator to pay for the OPS'
7 material testing in the absence of a finding by an adjudicatory body that there has been a violation of
8 a pipeline safety rule by the operator or that there is a nexus between the testing and that violation.
9 SWG further comments that this rule is especially problematic in those instances where an operator
10 contests the testing and/or analysis of the OPS' selected laboratory and that dispute becomes central
11 to an enforcement proceeding prosecuted by the Staff against the operator.
12

13 In that instance, SWG argues that the operator will bear the penalty of paying for what will be
14 Staff's expert witness before there is even a hearing on the alleged violation. According to SWG, this
15 would permit the Commission to shift the cost of its own investigation onto the operator as a penalty
16 in violation of A.R.S. § 40-442(C), which requires that "[a]ll monies collected from civil penalties
17 assessed pursuant to this article. . .shall be deposited. . .in the state general fund."
18

19 Staff comments that pipeline safety regulation stems from A.R.S. § 40-441 such that the
20 requirement that the operator pay for the laboratory testing is not a violation of Arizona law. Staff
21 further comments that requiring operators to pay for testing is not punitive, that operators currently
22 pay for laboratory testing, and that regulators can impose certain costs and payment for performance
23 of certain functions on operators. Staff adds that laboratory testing is often done before any report is
24 issued and before any adversary administrative proceeding commences. Since requiring the operator
25 to pay costs for laboratory testing is not a penalty, A.R.S. § 40-422 is not implicated. Staff further
26 adds that nothing precludes an operator from having its own testing done and proffering evidence and
27
28

1 testimony from that testing.

2 **Analysis:** We agree with Staff that promulgation of a rule by which the operator is
3 required to pay for necessary laboratory testing is not a violation of Arizona law. Additionally, we do
4 not believe that SWG has established that the operator's obligation for payment constitutes a penalty
5 such that A.R.S. § 40-422 is implicated and/or violated.

6 **Resolution:** No change required.

7
8 **R14-5-202(S)(4)**

9 **Issue 1:** SWG comments that by allowing a Commission administrative law judge to
10 affirm or reject the operator's selection of the laboratory or the number and types of tests to be
11 performed, and that if adjudication is made to resolve a discovery dispute, the Commission may be
12 insulated from civil liability to injured persons as some form of judicial immunity may apply.

13 Staff comments that the OPS is the agency responsible for the safety of intrastate pipelines,
14 and therefore, the OPS, rather than an administrative law judge or independent arbiter, should have
15 the final word if a dispute arises.

16
17 **Analysis:** We agree with Staff. The rule does not provide for implementation of a review
18 by an administrative law judge as the OPS should make the final determination with regard to the
19 laboratory and number and types of tests chosen. Moreover, as previously indicated, it is unclear the
20 extent to which the Commission would be insulated from liability if discovery disputes were to be
21 adjudicated by a Commission administrative law judge.

22 **Resolution:** No change required.

23
24 **Issue 2:** SWG comments, and AUG agrees, that the language of the rule as proposed by
25 Staff should be deleted and should be amended to read as follows:

- 26 4. The rules provided in A.A.C. R14-3-101 through A.A.C. R14-3-113 shall
27 govern disputes between the operator and the Office of Pipeline Safety
28 concerning the laboratory testing conducted in accordance with this section,
including but not limited to the selection of the third-party laboratory, the

number and type of tests, and the location and timing of such tests. Destructive testing shall not be conducted on any removed portion of a pipeline once a party receives written notification from the other party that a dispute exists and is subject to resolution under this subsection.

SWG and AUG believe that such a provision would provide for a neutral third party arbiter should a dispute arise as to the laboratory chosen, the number and types of tests performed, and/or the test procedures to be utilized.

Staff comments that the OPS is the agency responsible for the safety of intrastate pipelines, and therefore, the OPS, rather than an administrative law judge or independent arbiter, should have the final word if a dispute arises.

Analysis: We agree with Staff. The rule does not provide for implementation of a review by an administrative law judge as the OPS should make the final determination with regard to the laboratory and number and types of tests chosen.

Resolution: No change required.

Issue 3: SWG comments that should the rule be amended such that OPS is the final arbiter of a dispute between it and the operator over the manner of testing and resolves those disputes in its own favor, then the operator may allege that its constitutional due process rights have been abridged by the OPS' summary edicts and that the testing ordered by OPS resulted in the destruction of evidence if the OPS later assumes a prosecutorial role in an enforcement action in which the OPS advocates the imposition of penalties against the operator.

SWG further comments that in this situation, an operator will allege that it is entitled to a proper remedy, which may include the preclusion of the test results in any enforcement action or outright dismissal of the enforcement action.

Staff comments that evidence of laboratory test results may be suppressed but only under certain limited circumstances, and suppressing evidence is a radical remedy that should only occur in very egregious situations. Additionally, Staff indicates that in a criminal proceeding, for example,

1 the destruction of evidence may result in an unfavorable inference to the state but would not result in
2 the suppression of the lab results.

3 Staff further comments that as long as some of the removed portion of the pipeline is
4 preserved so that other parties can conduct testing, there is no prejudice or denial of due process.
5 Suppression as a possible remedy does not mean that it is probable, and the Commission should not
6 fear approving these rules just because of the remote possibility that a scenario may arise where the
7 lab results could be suppressed.

8
9 **Analysis:** We agree with Staff that an operator's due process rights will not be violated
10 by destructive testing so long as either a sample is preserved for alternative testing or the parties
11 reach an agreement on the destructive testing prior to its undertaking. Additionally, we agree with
12 both parties that issues concerning destruction of evidence and appropriate sanctions should be
13 decided on a case-by-case basis such that it is not possible to predict the degree to which destructive
14 testing will render the state incapable of prosecuting any potential violations against the operator.
15 Consequently, we believe the amended rule should be adopted.

16
17 **Resolution:** No change required.

18 **Issue 4:** The City of Mesa comments that the rule directs the OPS to determine the
19 laboratory that will do the necessary testing thereby excluding the operator from the selection
20 process, which may create problems for the City as it is governed by bidding requirements relating to
21 the expenditure of public funds. Specifically, the City of Mesa notes that it could be problematic if
22 the state chooses to utilize the higher of two bids submitted by laboratories performing the same
23 service. The City of Mesa further commented that it was in the process of seeking a ruling on this
24 issue and would submit any such ruling as soon as it was obtained.

25
26 Staff comments that the issue requires consideration as it was not specifically taken into
27 account in this rule making, yet Staff further comments that it does not believe that the concerns
28

expressed by the City of Mesa are directly in conflict with the proposed amendment to the rule.

Analysis: We agree with Staff. The City of Mesa did not provide demonstrable evidence, in the form of a ruling, that payment by the operator violates its procurement laws, and consequently, the issue has not been shown to be in direct conflict with the proposed rule. It is, however, an issue which requires further consideration by the parties at a future workshop.

Resolution: No change required.

Issue 5: AUG comments that there are potential problems with a bid process conducted by the state in which the operators will be limited to three laboratories and no provisions are mentioned for cases in which three bids are not available.

Staff comments that the rules require a written request be submitted to at least three laboratories, and if no response to the bids is received after 30 days, then OPS can choose a laboratory.

Analysis: We agree with Staff.

Resolution: No change required.

R14-5-203 – Pipeline Incident Reports and Investigations

R14-5-203(B)(2)(f)(ii)

Issue 1: The SOS comments that it will no longer maintain incorporated reference materials on file and therefore, requests that the phrase “on file with the Office of the Secretary of State” be stricken from the final rulemaking package.

Staff agrees to the amendment with one exception, addition of the word “and” such that the phrase “and on file with the Office of the Secretary of State” should be stricken.

Analysis: We agree with Staff.

Resolution: Delete “and on file with the Office of the Secretary of State.”

1 **Issue 2:** The AUG comments that contact information for the Office of the Secretary of
2 State should be provided in the regulation.

3 Staff comments that based upon information from the SOS indicating that it will no longer
4 have incorporated reference materials on file, contact information should not be included in the final
5 rulemaking package.

6 **Analysis:** As it would be confusing to add contact information for an agency no longer
7 maintaining the incorporated referenced materials, we agree with Staff.

8 **Resolution:** No change required.

9
10 **Issue 3:** The AUG comments that the rules utilize inconsistent references to the Office
11 of Pipeline Safety and suggest that references thereto be consistent with R14-5-202(C).

12 Staff Comments that "Office of Pipeline Safety" is defined in R14-5-201 as "the Pipeline
13 Safety personnel for the Commission," and consequently, Staff recommends changing references to
14 the "Commission Office of Pipeline Safety" to "Office of Pipeline Safety" to ensure consistency
15 throughout the rules.

16
17 **Analysis:** We agree with Staff and AUG.

18 **Resolution:** Delete "Commission" immediately preceding "Office of Pipeline Safety."

19 **R14-5-203(B)(2)(g)**

20 **Issue:** The SOS comments that references to paragraph, subparagraph or item should
21 be changed to subsection to conform to the Arizona Rulemaking manual.

22 Staff agrees and comments that the sentence "[a]ny release of hazardous liquid or carbon
23 dioxide, that was significant in the judgment of the operator even though it did not meet the criteria
24 of any other paragraph of this section," should be changed to "[a]ny release of hazardous liquid or
25 carbon dioxide, that was significant in the judgment of the operator even though it did not meet the
26 criteria of this subsection."
27
28

1 **Analysis:** We agree with Staff and the SOS.

2 **Resolution:** Replace “of any other paragraph of this section” with “of this subsection.”

3 **R14-5-203(C)(2)(a)**

4 **Issue 1:** The SOS comments that it will no longer maintain incorporated reference
5 materials on file and therefore, requests that the phrase “on file with the Office of the Secretary of
6 State” be stricken from the final rulemaking package.

7 Staff agrees to the amendment with one exception, addition of the word “and” such that the
8 phrase “and on file with the Office of the Secretary of State” should be stricken.
9

10 **Analysis:** We agree with Staff.

11 **Resolution:** Delete “and on file with the Office of the Secretary of State.”

12 **Issue 2:** The AUG comments that contact information for the Office of the Secretary of
13 State should be provided in the regulation.

14 Staff comments that based upon information from the SOS indicating that it will no longer
15 have incorporated reference materials on file, contact information should not be included in the final
16 rulemaking package.
17

18 **Analysis:** As it would be confusing to add contact information for an agency no longer
19 maintaining the incorporated referenced materials, we agree with Staff.

20 **Resolution:** No change required.

21 **Issue 3:** The AUG comments that the rules utilize inconsistent references to the Office
22 of Pipeline Safety and suggest that references thereto be consistent with R14-5-202(C).
23

24 Staff Comments that “Office of Pipeline Safety” is defined in R14-5-201 as “the Pipeline
25 Safety personnel for the Commission,” and consequently, Staff recommends changing references to
26 the “Commission Office of Pipeline Safety” to “Office of Pipeline Safety” to ensure consistency
27 throughout the rules.
28

1 **Analysis:** We agree with Staff and AUG.

2 **Resolution:** Delete "Commission" immediately preceding "Office of Pipeline Safety."

3 **R14-5-203(C)(2)(b)**

4 **Issue 1:** The SOS comments that it will no longer maintain incorporated reference
5 materials on file and therefore, requests that the phrase "on file with the Office of the Secretary of
6 State" be stricken from the final rulemaking package.

7 Staff agrees to the amendment with one exception, addition of the word "and" such that the
8 phrase "and on file with the Office of the Secretary of State" should be stricken.

9 **Analysis:** We agree with Staff.

10 **Resolution:** Delete "and on file with the Office of the Secretary of State."

11 **Issue 2:** The AUG comments that contact information for the Office of the Secretary of
12 State should be provided in the regulation.

13 Staff comments that based upon information from the SOS indicating that it will no longer
14 have incorporated reference materials on file, contact information should not be included in the final
15 rulemaking package.

16 **Analysis:** As it would be confusing to add contact information for an agency no longer
17 maintaining the incorporated referenced materials, we agree with Staff.

18 **Resolution:** No change required.

19 **Issue 3:** The AUG comments that the rules utilize inconsistent references to the Office
20 of Pipeline Safety and suggest that references thereto be consistent with R14-5-202(C).

21 Staff comments that "Office of Pipeline Safety" is defined in R14-5-201 as "the Pipeline
22 Safety personnel for the Commission," and consequently, Staff recommends changing references to
23 the "Commission Office of Pipeline Safety" to "Office of Pipeline Safety" to ensure consistency
24 throughout the rules.

1 **Analysis:** We agree with Staff and AUG.

2 **Resolution:** Delete "Commission" immediately preceding "Office of Pipeline Safety."

3 **R14-5-203(C)(3)**

4 **Issue 1:** The SOS comments that it will no longer maintain incorporated reference
5 materials on file and therefore, requests that the phrase "on file with the Office of the Secretary of
6 State" be stricken from the final rulemaking package.

7 Staff agrees to the amendment with one exception, addition of the word "and" such that the
8 phrase "and on file with the Office of the Secretary of State" should be stricken.

9 **Analysis:** We agree with Staff.

10 **Resolution:** Delete "and on file with the Office of the Secretary of State."

11 **Issue 2:** The AUG comments that contact information for the Office of the Secretary of
12 State should be provided in the regulation.

13 Staff comments that based upon information from the SOS indicating that it will no longer
14 have incorporated reference materials on file, contact information should not be included in the final
15 rulemaking package.

16 **Analysis:** As it would be confusing to add contact information for an agency no longer
17 maintaining the incorporated referenced materials, we agree with Staff.

18 **Resolution:** No change required.

19 **Issue 3:** The AUG comments that the rules utilize inconsistent references to the Office
20 of Pipeline Safety and suggest that references thereto be consistent with R14-5-202(C).

21 Staff Comments that "Office of Pipeline Safety" is defined in R14-5-201 as "the Pipeline
22 Safety personnel for the Commission," and consequently, Staff recommends changing references to
23 the "Commission Office of Pipeline Safety" to "Office of Pipeline Safety" to ensure consistency
24 throughout the rules.

1 **Analysis:** We agree with Staff and AUG.

2 **Resolution:** Delete "Commission" immediately preceding "Office of Pipeline Safety."

3 **R14-5-203(C)(3)(c)(ii)**

4 **Issue 1:** The SOS comments that it will no longer maintain incorporated reference
5 materials on file and therefore, requests that the phrase "on file with the Office of the Secretary of
6 State" be stricken from the final rulemaking package.

7 Staff agrees to the amendment with one exception, addition of the word "and" such that the
8 phrase "and on file with the Office of the Secretary of State" should be stricken.
9

10 **Analysis:** We agree with Staff.

11 **Resolution:** Delete "and on file with the Office of the Secretary of State."

12 **Issue 2:** The AUG comments that contact information for the Office of the Secretary of
13 State should be provided in the regulation.

14 Staff comments that based upon information from the SOS indicating that it will no longer
15 have incorporated reference materials on file, contact information should not be included in the final
16 rulemaking package.
17

18 **Analysis:** As it would be confusing to add contact information for an agency no longer
19 maintaining the incorporated referenced materials, we agree with Staff.

20 **Resolution:** No change required.

21 **Issue 3:** The AUG comments that the rules utilize inconsistent references to the Office
22 of Pipeline Safety and suggest that references thereto be consistent with R14-5-202(C).
23

24 Staff Comments that "Office of Pipeline Safety" is defined in R14-5-201 as "the Pipeline
25 Safety personnel for the Commission," and consequently, Staff recommends changing references to
26 the "Commission Office of Pipeline Safety" to "Office of Pipeline Safety" to ensure consistency
27 throughout the rules.
28

1 **Analysis:** We agree with Staff and AUG.

2 **Resolution:** Delete "Commission" immediately preceding "Office of Pipeline Safety."

3 **R14-5-204 – Annual Reports**

4 **R14-5-204(A)(1)**

5 **Issue 1:** The AUG comments that contact information for the Office of the Secretary of
6 State should be provided in the regulation.

7 Staff comments that based upon information from the SOS indicating that it will no longer
8 have incorporated reference materials on file, contact information should not be included in the final
9 rulemaking package.
10

11 **Analysis:** As it would be confusing to add contact information for an agency no longer
12 maintaining the incorporated referenced materials, we agree with Staff.

13 **Resolution:** No change required.

14 **Issue 2:** AUG comments that the report forms used by the Commission should be the
15 current forms specified by the federal regulations. AUG suggests, therefore, that the Commission
16 adopt the most current version of the federal pipeline incident reporting and Annual Report forms.
17

18 Staff comments that the form and noted edition is the most recent as of July 6, 2004. Staff
19 recommends, however, that the word "Edition" should be added after "February 2004."

20 **Analysis:** We agree with Staff that the form and noted edition is the most recent.

21 **Resolution:** Insert "Edition" after "February 2004."

22 **R14-5-204(A)(2)**

23 **Issue 1:** The SOS comments that it will no longer maintain incorporated reference
24 materials on file and therefore, requests that the phrase "on file with the Office of the Secretary of
25 State" be stricken from the final rulemaking package.
26
27
28

1 Staff agrees and states that the phrase "on file with the Office of the Secretary of State"
2 should be stricken.

3 **Analysis:** We agree with Staff and the SOS.

4 **Resolution:** Delete "on file with the Office of the Secretary of State."

5 **Issue 2:** The AUG comments that contact information for the Office of the Secretary of
6 State should be provided in the regulation.

7 Staff comments that based upon information from the SOS indicating that it will no longer
8 have incorporated reference materials on file, contact information should not be included in the final
9 rulemaking package.

10 **Analysis:** As it would be confusing to add contact information for an agency no longer
11 maintaining the incorporated referenced materials, we agree with Staff.

12 **Resolution:** No change required.

13 **Issue 3:** The AUG comments that the rules utilize inconsistent references to the Office
14 of Pipeline Safety and suggests that references thereto be consistent with R14-5-202(C).

15 Staff Comments that "Office of Pipeline Safety" is defined in R14-5-201 as "the Pipeline
16 Safety personnel for the Commission," and consequently, Staff recommends changing references to
17 the "Commission Office of Pipeline Safety" to "Office of Pipeline Safety" to ensure consistency
18 throughout the rules.

19 **Analysis:** We agree with Staff and AUG.

20 **Resolution:** Delete "Commission" immediately preceding "Office of Pipeline Safety."

21 **Issue 4:** AUG comments that the report forms used by the Commission should be the
22 current forms specified by the federal regulations. AUG suggests, therefore, that the Commission
23 adopt the most current version of the federal pipeline incident reporting and Annual Report forms.

Staff agrees with AUG's comments and recommends that the most recent edition be cited in the rule. Accordingly, Staff recommends adding "for use in 2004; March 2005 Edition" before "and no future editions" and adding ", which can be used in 2004 but will become mandatory starting in 2005" thereafter.

Analysis: We agree with Staff.

Resolution: Amend subsection (2) to read "November 1985 Edition for use in 2004; March 2005 Edition and no future editions, which can be used in 2004 but will become mandatory starting in 2005."

R14-5-204(A)(3)

Issue 1: The SOS comments that it will no longer maintain incorporated reference materials on file and therefore, requests that the phrase "on file with the Office of the Secretary of State" be stricken from the final rulemaking package.

Staff agrees and states that the phrase "on file with the Office of the Secretary of State" should be stricken.

Analysis: We agree with Staff and the SOS.

Resolution: Delete "on file with the Office of the Secretary of State."

Issue 2: The AUG comments that contact information for the Office of the Secretary of State should be provided in the regulation.

Staff comments that based upon information from the SOS indicating that it will no longer have incorporated reference materials on file, contact information should not be included in the final rulemaking package.

Analysis: As it would be confusing to add contact information for an agency no longer maintaining the incorporated referenced materials, we agree with Staff.

Resolution: No change required.

Issue 3: The AUG comments that the rules utilize inconsistent references to the Office of Pipeline Safety and suggests that references thereto be consistent with R14-5-202(C).

Staff Comments that "Office of Pipeline Safety" is defined in R14-5-201 as "the Pipeline Safety personnel for the Commission," and consequently, Staff recommends changing references to the "Commission Office of Pipeline Safety" to "Office of Pipeline Safety" to ensure consistency throughout the rules.

Analysis: We agree with Staff and AUG.

Resolution: Delete "Commission" immediately preceding "Office of Pipeline Safety."

Issue 4: AUG comments that the report forms used by the Commission should be the current forms specified by the federal regulations. AUG suggests, therefore, that the Commission adopt the most current version of the federal pipeline incident reporting and Annual Report forms.

Staff agrees with AUG's comments and recommends that the most recent edition be cited in the rule. Accordingly, Staff recommends deleting "January 2002" as the noted edition and adding "December 2003."

Analysis: We agree with Staff and AUG.

Resolution: Replace "January 2002" with "December 2003."

R14-5-205 – Master Meter System Operators

R14-5-205

Issue: The AUG comments that Internet addresses should be provided for each agency or entity referenced.

Subsequent to a workshop meeting, Staff and AUG agree to consider this proposal in an upcoming workshop.

Analysis: We agree with AUG and Staff that this issue should be addressed in a future workshop.

1 **Resolution:** No change required

2 **R14-5-205(B)**

3 **Issue 1:** The AUG comments that the address listed for the U.S. Government Printing
4 Office should be updated to reflect its warehouse services address, which is 8660 Cherry Lane,
5 Laurel, MD 20707.

6 Staff comments that the address should be changed to P.O. Box 371954, Pittsburgh,
7 Pennsylvania 15250-7954.

8 **Analysis:** We agree with Staff. The U.S. Government Printing Office website indicates
9 that orders by mail should be sent to P.O. Box 371954, Pittsburgh^h, Pennsylvania 15250-7954.
10

11 **Resolution:** Replace "P.O. Box 371975M, Pittsburgh, Pennsylvania 15250-7975" with
12 "P.O. Box 371954, Pittsburgh, Pennsylvania 15250-7954."

13 **Issue 2:** The SOS comments that it will no longer maintain incorporated reference
14 materials on file and therefore, requests that the phrase "on file with the Office of the Secretary of
15 State" be stricken from the final rulemaking package.
16

17 Staff agrees and states that the phrase "on file with the Office of the Secretary of State"
18 should be stricken.

19 **Analysis:** We agree with Staff and the SOS.

20 **Resolution:** Delete "on file with the Office of the Secretary of State."

21 **Issue 3:** The AUG comments that contact information for the Office of the Secretary of
22 State should be provided in the regulation.
23

24 Staff comments that based upon information from the SOS indicating that it will no longer
25 have incorporated reference materials on file, contact information should not be included in the final
26 rulemaking package.
27
28

1 **Analysis:** As it would be confusing to add contact information for an agency no longer
2 maintaining the incorporated referenced materials, we agree with Staff.

3 **Resolution:** No change required.

4 **Issue 4:** The AUG comments that the rules utilize inconsistent references to the Office
5 of Pipeline Safety and suggests that references thereto be consistent with R14-5-202(C).

6 Staff Comments that "Office of Pipeline Safety" is defined in R14-5-201 as "the Pipeline
7 Safety personnel for the Commission," and consequently, Staff recommends changing references to
8 the "Commission Office of Pipeline Safety" to "Office of Pipeline Safety" to ensure consistency
9 throughout the rules.
10

11 **Analysis:** We agree with Staff and AUG.

12 **Resolution:** Delete "Commission" immediately preceding "Office of Pipeline Safety."

13 **R14-5-205(G)**

14 **Issue 1:** The AUG comments that the address listed for the U.S. Government Printing
15 Office should be updated to reflect its warehouse services address, which is 8660 Cherry Lane,
16 Laurel, MD 20707.
17

18 Staff comments that the address should be changed to P.O. Box 371954, Pittsburgh,
19 Pennsylvania 15250-7954.

20 **Analysis:** We agree with Staff. The U.S. Government Printing Office website indicates
21 that orders by mail should be sent to P.O. Box 371954, Pittsburgh, Pennsylvania 15250-7954.

22 **Resolution:** Replace "P.O. Box 371975M, Pittsburgh, Pennsylvania 15250-7975" with
23 "P.O. Box 371954, Pittsburgh, Pennsylvania 15250-7954."
24

25 **Issue 2:** The SOS comments that it will no longer maintain incorporated reference
26 materials on file and therefore, requests that the phrase "on file with the Office of the Secretary of
27 State" be stricken from the final rulemaking package.
28

1 Staff agrees and states that the phrase "on file with the Office of the Secretary of State"
2 should be stricken.

3 **Analysis:** We agree with Staff and the SOS.

4 **Resolution:** Delete "on file with the Office of the Secretary of State."

5 **Issue 3:** The AUG comments that contact information for the Office of the Secretary of
6 State should be provided in the regulation.

7 Staff comments that based upon information from the SOS indicating that it will no longer
8 have incorporated reference materials on file, contact information should not be included in the final
9 rulemaking package.

10 **Analysis:** As it would be confusing to add contact information for an agency no longer
11 maintaining the incorporated referenced materials, we agree with Staff.

12 **Resolution:** No change required.

13 **Issue 4:** The AUG comments that the rules utilize inconsistent references to the Office
14 of Pipeline Safety and suggest that references thereto be consistent with R14-5-202(C).
15

16 Staff Comments that "Office of Pipeline Safety" is defined in R14-5-201 as "the Pipeline
17 Safety personnel for the Commission," and consequently, Staff recommends changing references to
18 the "Commission Office of Pipeline Safety" to "Office of Pipeline Safety" to ensure consistency
19 throughout the rules.
20

21 **Analysis:** We agree with Staff and AUG.

22 **Resolution:** Delete "Commission" immediately preceding "Office of Pipeline Safety."
23

24 **R14-5-205(I)**

25 **Issue:** Staff comments that as this subsection addresses bedding and shading for
26 master meter system operators, it should be amended in accordance with the proposed amendment for
27 R14-5-202(O) by retaining the phrase "using plastic pipe" and adding the sentence, "Steel pipe shall
28

1 be installed with bedding and shading, free of any debris or materials injurious to the pipe coating,
2 unless otherwise protected and approved by the Office of Pipeline Safety" at the end of the
3 subsection.

4 **Analysis:** We agree with Staff.

5 **Resolution:** Add "Steel pipe shall be installed with bedding and shading, free of any debris
6 or materials injurious to the pipe coating, unless otherwise protected and approved by the Office of
7 Pipeline Safety" at the end of the subsection.
8

9 **R14-5-205(J)**

10 **Issue 1:** AUG comments that the reference to ASTM should be updated to reflect the
11 fact that the organization is now referred to as ASTM International.

12 Staff agrees with AUG's comment and adds that the address listed for ASTM should be
13 updated to reflect the new address, which is 100 Barr Harbor Drive, P.O. Box C700, West
14 Conshohocken, Pennsylvania 19428-2959.
15

16 **Analysis:** We agree with Staff and AUG.

17 **Resolution:** Replace "the ASTM, 1916 Race Street, Philadelphia, Pennsylvania 19103-
18 1187," with "ASTM International, 100 Barr Harbor Drive, P.O. Box C700, West Conshohocken,
19 Pennsylvania 19428-2959."
20

21 **Issue 2:** To maintain conformity between the provisions for operators of intrastate
22 pipelines and master meter system operators, this subsection should be amended in the same manner
23 proposed by Staff for R14-5-202.P. In reference to R14-5-202.P, Staff and AUG agree that the
24 phrase "shall be marked 'Gas' and" should be deleted such that the subsection should read, "In
25 addition, all plastic pipe and fittings shall be marked CD, CE, CF or CG as required by ASTM
26 D2513."
27
28

1 **Analysis:** We believe that the subsection should be amended in conformity with R14-5-
2 202.P.

3 **Resolution:** Delete "shall be marked 'Gas' and."

4 **Issue 3:** The SOS comments that it will no longer maintain incorporated reference
5 materials on file and therefore, requests that the phrase "on file with the Office of the Secretary of
6 State" be stricken from the final rulemaking package.

7 Staff agrees and states that the phrase "on file with the Office of the Secretary of State"
8 should be stricken.
9

10 **Analysis:** We agree with Staff and the SOS.

11 **Resolution:** Delete "on file with the Office of the Secretary of State."

12 **Issue 4:** The AUG comments that contact information for the Office of the Secretary of
13 State should be provided in the regulation.

14 Staff comments that based upon information from the SOS indicating that it will no longer
15 have incorporated reference materials on file, contact information should not be included in the final
16 rulemaking package.
17

18 **Analysis:** As it would be confusing to add contact information for an agency no longer
19 maintaining the incorporated referenced materials, we agree with Staff.

20 **Resolution:** No change required.

21 **Issue 5:** The AUG comments that the rules utilize inconsistent references to the Office
22 of Pipeline Safety and suggest that references thereto be consistent with R14-5-202(C).
23

24 Staff Comments that "Office of Pipeline Safety" is defined in R14-5-201 as "the Pipeline
25 Safety personnel for the Commission," and consequently, Staff recommends changing references to
26 the "Commission Office of Pipeline Safety" to "Office of Pipeline Safety" to ensure consistency
27 throughout the rules.
28

1 **Analysis:** We agree with Staff and AUG.

2 **Resolution:** Delete "Commission" immediately preceding "Office of Pipeline Safety."

3 **R14-5-205(O)**

4 **Issue 1:** The SOS comments that it will no longer maintain incorporated reference
5 materials on file and therefore, requests that the phrase "on file with the Office of the Secretary of
6 State" be stricken from the final rulemaking package.

7
8 Staff agrees and states that the phrase "on file with the Office of the Secretary of State"
9 should be stricken.

10 **Analysis:** We agree with Staff and the SOS.

11 **Resolution:** Delete "on file with the Office of the Secretary of State."

12 **Issue 2:** The AUG comments that contact information for the Office of the Secretary of
13 State should be provided in the regulation.

14 Staff comments that based upon information from the SOS indicating that it will no longer
15 have incorporated reference materials on file, contact information should not be included in the final
16 rulemaking package.

17
18 **Analysis:** As it would be confusing to add contact information for an agency no longer
19 maintaining the incorporated referenced materials, we agree with Staff.

20 **Resolution:** No change required.

21 **Issue 3:** The AUG comments that the rules utilize inconsistent references to the Office
22 of Pipeline Safety and suggest that references thereto be consistent with R14-5-202(C).

23
24 Staff Comments that "Office of Pipeline Safety" is defined in R14-5-201 as "the Pipeline
25 Safety personnel for the Commission," and consequently, Staff recommends changing references to
26 the "Commission Office of Pipeline Safety" to "Office of Pipeline Safety" to ensure consistency
27 throughout the rules.

1 **Analysis:** We agree with Staff and AUG.

2 **Resolution:** Delete "Commission" immediately preceding "Office of Pipeline Safety."

3 **R14-5-205(P)**

4 **Issue:** The SOS comments that references to "paragraph," "subparagraph" or "item"
5 should be changed to "subsection" to conform to the Arizona Rulemaking manual.

6 Staff agrees and recommends conforming changes to utilize the term "subsection."

7 **Analysis:** We agree with the SOS and Staff.

8 **Resolution:** Replace all references to "paragraph," "subparagraph" and "item" with
9 "subsection."
10

11 **R14-5-205(P)(1)**

12 **Issue:** Staff comments that R14-2-205(P)(1) should be amended in accordance with
13 the amendment proposed for R14-2-202(S)(1) as it is the corollary provision applicable to master
14 meter operators.

15 **Analysis:** We agree with Staff, yet we believe that two minor modifications in the
16 language of the proposed rule would provide clarity. Specifically, subsection (1) should be amended
17 by inserting the phrase "where the cause of the failure is unknown" immediately after "failed
18 pipeline," and subsequently, the word "from" should be replaced with the phrase "as the result of"
19 such that the sentence reads as follows: "If an operator of an intrastate natural gas, other gas or
20 hazardous liquid pipeline removes a portion of a failed pipeline, where the cause of the failure is
21 unknown, as the result of an incident that requires a telephonic or written incident report under R14-
22 5-203(B) or (C), the operator shall retain the portion that was removed and shall telephonically notify
23 the Office of Pipeline Safety of the removal within two hours after the removal is completed."
24

25 **Resolution:** Amend 205(P)(1) to read as follows:
26

27 P. Laboratory testing of master meter systems shall be conducted in accordance with the
28 following:

1. If an operator of a master meter system, other gas or hazardous liquid pipeline removes a portion of a failed pipeline, where the cause of the failure is unknown, as the result of an incident that requires a telephonic or written incident report under R14-5-203(B) or (C), the operator shall retain the portion that was removed and shall telephonically notify the Office of Pipeline Safety of the removal within two hours after the removal is completed. A notice made pursuant to this subsection shall include all of the following:

- a. Identity of the failed pipeline.
- b. Description and location of the failure.
- c. Date and time of the removal.
- d. Length or quantity of the removed portion.
- e. Storage location of the removed portion.
- f. Any additional information about the failure or the removal of the portion of the pipeline that failed that is requested by the Office of Pipeline Safety.

An unknown failure is any failure where the cause of the failure is not observable external corrosion, third-party damage, natural or other outside forces, construction or material defect, equipment malfunction or incorrect operations; or is any failure where the Office of Pipeline Safety and the operator do not agree as to the cause of the failure.

R14-5-205(P)(2)

Issue: To the extent that 205(P)(1) is amended as stated above, we believe that 205(P)(2) should be amended in accordance with any amendments to 202(S)(2).

Analysis: Accordingly, the word "telephonic" and additional language directing the Office of Pipeline Safety to confirm its notification in writing should be added to this subsection in accordance with the proposed amendment to 202(S)(2). Clarifying that the notification pursuant to subsection (1) is telephonic in nature creates consistency among the subsections. Additionally, requiring the OPS to confirm the telephonic notification in writing is not unduly burdensome, would improve clarity, and eliminate any dispute as to whether telephonic notification had been effected.

Additionally, we believe that the word "that" should be moved and inserted between the words "operator" and "either" in the second line of the subsection.

Resolution: Amend 205(P)(2) to read as follows:

2. Within forty-eight hours after telephonic notification pursuant to subsection (1), the Office of Pipeline Safety shall notify the operator that either:

- a. The Office of Pipeline Safety is directing the operator to have the portion of the pipeline that was removed tested by a laboratory to determine the cause or causes of the failure; or
- b. The Office of Pipeline Safety is not directing laboratory testing and the operator may discard the portion of the pipeline that was removed.

The Office of Pipeline Safety shall confirm its notification in writing.

R14-5-205(Q)

Issue 1: The SOS comments that it will no longer maintain incorporated reference materials on file and therefore, requests that the phrase "on file with the Office of the Secretary of State" be stricken from the final rulemaking package.

Staff agrees and states that the phrase "on file with the Office of the Secretary of State" should be stricken.

Analysis: We agree with Staff and the SOS.

Resolution: Delete "on file with the Office of the Secretary of State."

Issue 2: The AUG comments that contact information for the Office of the Secretary of State should be provided in the regulation.

Staff comments that based upon information from the SOS indicating that it will no longer have incorporated reference materials on file, contact information should not be included in the final rulemaking package.

Analysis: As it would be confusing to add contact information for an agency no longer maintaining the incorporated referenced materials, we agree with Staff.

Resolution: No change required.

Issue 3: The AUG comments that the rules utilize inconsistent references to the Office of Pipeline Safety and suggest that references thereto be consistent with R14-5-202(C).

1 Staff Comments that "Office of Pipeline Safety" is defined in R14-5-201 as "the Pipeline
2 Safety personnel for the Commission," and consequently, Staff recommends changing references to
3 the "Commission Office of Pipeline Safety" to "Office of Pipeline Safety" to ensure consistency
4 throughout the rules.

5 **Analysis:** We agree with Staff and AUG.

6 **Resolution:** Delete "Commission" immediately preceding "Office of Pipeline Safety."

Appendix CECONOMIC, SMALL BUSINESS AND CONSUMER IMPACT STATEMENT

1. **BRIEF DESCRIPTION:** The proposed amendments will amend already existing rules (R14-5-202, R14-5-203, R14-5-204, and R14-5-205) under Chapter 5, which is entitled "Transportation."

The proposed amendments to the existing rules are designed to update the Arizona Corporation Commission Pipeline Safety rules to recognize the amendments to Title 49, Code of Federal Regulations (CFR) Parts 40, 191, 192, 193, 195 and 199 as of January 15, 2004 (Minimum Safety Standards for Construction, Operation and Maintenance of natural gas, other gases and hazardous liquid pipeline facilities).

Furthermore, the proposed amendments will change the physical address for the Office of Pipeline Safety. The proposed amendments to A.A.C. R14-5-202(O) and R14-5-205(I) will define proper bedding and shading to be provided around plastic and steel underground pipelines during construction. Proposed amendments to R14-5-202(P) and R14-5-205(J) will additionally change the requirements for marking fittings and plastic pipelines.

The proposed amendments regarding laboratory testing of a failed pipeline, as set forth in R14-5-202(S) and R14-5-205(P), create a framework within which both intrastate pipeline operators and master meter operators must comply with the Office of Pipeline Safety's requirements. These requirements include the Office of Pipeline Safety selecting the laboratory where a sample of the failed pipeline is to be tested and determining the number and type of tests to be performed. The proposed amendments will also require the laboratory results to be submitted directly to the Office of Pipeline Safety. 49 CFR 192.617 requires a pipeline operator to establish procedures for analyzing a failure and determining the cause of an incident. The proposed amendments regarding laboratory testing are not, however, inconsistent with the federal regulations.

2. NEED: The Commission has been granted agent status by which it is allowed to enforce the Federal Pipeline Safety Standards. To maintain that status, the Commission must, pursuant to the Natural Gas Pipeline Safety Act and the Hazardous Liquid Pipeline Safety Act, adopt and remain current with the Federal Pipeline Safety Standards.

The Commission believes that through the adoption and incorporation by reference of updates to Title 49, the rules will be consistent with the federal regulations and will thereby enhance public safety, which will ultimately be in the best interest of the citizens of the State of Arizona.

In addition, the Office of Pipeline Safety has the authority to impose additional restrictions on intrastate pipelines provided the additional restrictions are not inconsistent with the federal regulations. The additional regulations relating to laboratory testing, shading of pipelines, and the marking of plastic fittings and pipelines are necessary to ensure and protect the public health and safety.

3. AFFECTED CLASS OF PERSONS:

- A. Operators of master meter gas distribution systems.
- B. Intrastate operators of natural gas and other gas pipelines.
- C. Intrastate operators of hazardous liquid pipelines.

4. COST-BENEFIT ANALYSIS OF RULE IMPACT ON AFFECTED CLASSES OF PERSONS:

A. There will be little impact on master meter system operators who are already in compliance with the Federal Pipeline Safety Regulations. The proposed amendments regarding shading of pipe as well as the marking of plastic pipe and fittings should have no impact. The proposed amendments regarding laboratory testing may have some impact as the Office of Pipeline Safety will select the laboratory as well as the number and types of tests to be performed and have direct access to the laboratory results. Additionally, master meter system operators will, pursuant to the amended rules, be required to pay for the laboratory testing. Although the rule mandates that the operator

1 pay for necessary testing, this is a cost currently borne by the operator and does not,
2 therefore, represent an additional cost to the operator.

3 **B.** There will be little impact on operators of natural gas or other gas systems who are
4 already in compliance with the Federal Pipeline Safety Regulations. The proposed
5 amendments regarding shading of pipe as well as the marking of plastic pipe and fittings
6 should have no impact. The proposed amendments regarding laboratory testing may
7 have some impact as the Office of Pipeline Safety will select the laboratory as well as the
8 number and types of tests to be performed and have direct access to the laboratory results.
9 Additionally, operators of natural gas or other gas systems will, pursuant to the amended
10 rules, be required to pay for the laboratory testing. Although the rule mandates that the
11 operator pay for necessary testing, this is a cost currently borne by the operator and does
12 not, therefore, represent an additional cost to the operator

13 **C.** There will be little impact on operators of hazardous liquid pipelines who are already
14 in compliance with the Federal Pipeline Safety Regulations. The proposed amendments
15 regarding shading of pipe as well as the marking of plastic pipe and fittings should have
16 no impact. The proposed amendments regarding laboratory testing may have some
17 impact as the Office of Pipeline Safety will select the laboratory as well as the number
18 and types of tests to be performed and have direct access to the laboratory results.
19 Additionally, operators of hazardous liquid pipelines will, pursuant to the amended rules,
20 be required to pay for the laboratory testing. Although the rule mandates that the
21 operator pay for necessary testing, this is a cost currently borne by the operator and does
22 not, therefore, represent an additional cost to the operator

23 **5. COSTS AND BENEFITS TO THE AGENCY:** The proposed amendments will
24 provide the Commission with better access to information regarding the status of natural
25 gas, other gas, and hazardous liquid pipelines operating within Arizona. The proposed
26 amendments to the rules will have no effect on other state agencies. While the proposed
27 amendments regarding laboratory testing may have some impact on pipeline and master
28

1 meter operators, the amendments are required to ensure and protect public health and
2 safety.

3 The costs to the Commission of the proposed rulemaking relate to the undertaking of
4 new tasks at the Commission. For example, the Office of Pipeline Safety staff will be
5 required to review newly required annual reports, to review information provided by
6 pipeline operators relating to any pipeline failure, to make a determination as to whether
7 testing relating to the failure is required, to undertake the laboratory selection process,
8 and to make a determination as to the number and types of tests to be performed.

9 The Office of Pipeline Safety must have the ability to determine the cause of an
10 incident, and laboratory testing is a key means of determining the cause or causes of a
11 leak, explosion or other incident involving natural gas or hazardous liquids. Thus, the
12 Office of Pipeline Safety must have the ability to mandate the number and types of
13 laboratory tests and have direct and expedient access to the test results.

14 The benefits of the proposed amendments regarding shading requirements for
15 hazardous liquid pipelines are derived from ensuring the public health. The benefits of
16 the proposed amendments regarding the marking of fittings and plastic pipelines are (1)
17 the ability to meet the new federal standards for newly-installed fittings and plastic
18 pipelines; and (2) the ability to accurately reflect the ratings of those fittings and plastic
19 pipelines. Overall, the benefits to the public health and safety outweigh any potential
20 cost to master meter and intrastate pipeline operators.

21 **6. COSTS AND BENEFITS TO POLITICAL SUBDIVISIONS:** For those political
22 subdivisions that are operators of intrastate pipelines or master meter operators, there will
23 be little or no impact to the extent they are currently in compliance with Federal Pipeline
24 Safety Regulations. Any impact or cost to those political subdivisions will be similar to
25 those of other operators. As the operator will be required to pay for the laboratory
26 testing, municipalities may bear an additional cost to resolve procurement issues arising
27
28

1 from a potential conflict between the manner in which a laboratory is chosen pursuant to
2 the rules and the municipalities' governing procurement laws.

3 The benefits to political subdivisions include the preservation and protection of the
4 public health and safety as previously described.

5 **7. COSTS AND BENEFITS TO PRIVATE PERSONS:** There should be little or no
6 additional cost to taxpayers, ratepayers and/or customers. The proposed amendments
7 provide this class of persons with improved safety and assure that all construction,
8 operation and maintenance activities are accomplished in accordance with the established
9 minimum federal safety standards as well as any additional state standards where
10 appropriate.

11 **8. COSTS AND BENEFITS TO CONSUMERS OR USERS OF ANY PRODUCT OR**
12 **SERVICE IN THE IMPLEMENTATION OF THE NEW RULES:** The new rules
13 will have no effect upon consumers or users of the gas services provided by the regulated
14 public utilities as they are presently required to be in compliance with applicable
15 standards. The proposed amendments will, however, benefit consumers, users and the
16 general public by ensuring the operation and maintenance of a safe pipeline system.

17 **9. PROBABLE EFFECT ON STATE REVENUES:** The proposed rules provide an
18 increased regulatory role for the Commission, which may result in increased litigation
19 relating to any allegedly negligent oversight of the laboratory selection and/or testing
20 process that proximately results in an injury. Any additional cost to the State, however, is
21 not measurable to the extent that the State may currently be subject to litigation for
22 alleged negligent oversight, and additional liability related to the increased oversight of
23 the laboratory process is highly speculative.

24 **10. LESS COSTLY OR INTRUSIVE METHODS:** The proposed rules represent the least
25 costly method for obtaining compliance with the minimum federal safety standards.
26 There are no less intrusive methods that will ensure the public health and safety to the
27 degree ensured by the proposed amendments.
28

1 **11. ALTERNATIVE METHODS CONSIDERED:** There are no alternative methods
2 available to ensure the public health and safety to the degree provided by the proposed
3 amendments.

4 **12. PROBABLE IMPACT ON SMALL BUSINESS:**

5 **A. Small business subject to the Rules:** Businesses subject to the rulemaking are
6 operators of natural gas, other gas, and hazardous liquid pipelines as well as master meter
7 operators, which may include mobile home parks, apartment complexes and other small
8 commercial operations. However, few of the master meter and pipeline operators qualify
9 as small businesses as defined by A.R.S. § 41-1001(19).

10 **B. Administrative and other costs required for compliance:** The costs to the
11 Commission of the proposed rulemaking relate to the undertaking of new tasks at the
12 Commission. For example, the Office of Pipeline Safety staff will be required to review
13 newly required annual reports, to review information provided by pipeline operators
14 relating to any pipeline failure, to make a determination as to whether testing relating to
15 the failure is required, to undertake the laboratory selection process, and to make a
16 determination as to the number and types of tests to be performed.

17 The potential costs to the master meter or pipeline operators will relate to increased
18 reporting requirements in the case of a failed pipeline and any voluntary laboratory costs
19 incurred by the operator in addition to the costs relating to the laboratory tests mandated
20 by the Office of Pipeline Safety.

21 **C. Description of methods used to reduce impact on small business:** The impact of
22 the rule's new requirements on the small business community are minimal as most master
23 meter and intrastate pipeline operators do not qualify as small businesses.

24 **D. Feasibility and legality of methods proposed in (3) above:** Not applicable.
